VISTAFOLIA®

ARTIFICIAL GREEN WALLS

BRING WALLS TO LIFE

EXPLORE VISTAFOLIA®

The market leader in artificial green walls

Where horticultural limits are reached, our artificial green walls are the market-leading solution for spaces where plants cannot grow.

Our green walls transcend the need for light and water and are at home anywhere your imagination takes them.

Manufacturing our Vistafolia® Panels to the highest standards in our own facility, we have faithfully replicated nature's beauty using colours and forms virtually indistinguishable from real plants.

OUR PHILOSOPHY

At Vistafolia®, we are driven by the passion to create inspiring, uplifting environments that will enhance and enrich everyday life. We seek to engage our customers to be co-creators with us in developing vibrant living and working spaces infused with the spirit of nature. Our aim is to design and manufacture the most beautiful artificial green walls in the world, retailed at reasonable prices and made using only the highest quality materials.

We constantly innovate to ensure that our products are an exciting blend of high style and simplicity of function. To offer as many options as possible, our designed solutions to practical greening are exceptionally customisable, allowing customers to refresh their surroundings in their own unique way.

A personal touch

Paul Alder leads Vistafolia® and has 25 years' experience in the landscape industry. He has won multiple awards including 12 national awards, 5 Chelsea medals including the highly coveted Gold, and a Gold medal at Hampton Court Flower Show.

"As a multi-award winning horticulturalist with 25 years' experience of building gardens for prestigious commercial and residential projects, I realised there is a demand for a flexible system that creates the look of a beautiful vertical garden wall planting without the hassle of using real plants that require natural light and ongoing maintenance."

Vistafolia® is not simply a more cost-effective and zero-maintenance alternative to a real green wall (although both these statements are true). Vistafolia® was created to solve the problem of greening spaces where real plants cannot grow.

Our panel system was created to meet the demands of designers and architects as well as the general public who were struggling with the installation, ongoing maintenance and high cost of growing real plants vertically.

'Vistafolia® was created to solve the problem of greening spaces where real plants cannot grow.'

RESEARCH AND DEVELOPMENT COMMIT US TO EXCELLENCE

Our success depends on innovation, which means constantly improving on product design and durability, anticipating new needs for natural-looking environments and creating seamless and better interactions between our green walls and our customers.

WHERE CREATIVITY RUNS HIGH

DESIGN INCUBATOR

SHOWROOM FACILITY

TRAINING VENUE

GLOBAL DISTRIBUTION CENTRE

Our Vistafolia® Research and Development Centre in Surrey, United Kingdom, is a multi-purpose facility for product design and testing, sales and installation training, distribution and customer engagement.

WHY SPECIFY VISTAFOLIA®

The Vistafolia® system has been rigorously tested and installed in a wide variety of challenging environments, both internal and external. It is quick and easy to install, and requires low maintenance.

HIGHEST STANDARDS & PERFORMANCE

- ✓ Best green wall solution available
- ✓ Indoor and outdoor use
- ✓ Truly unique designs
- ✓ Easily customised to any style
- ✓ Hassle-free & easy to install

GOLD STANDARD IN ARTIFICIAL GREEN WALLS

- ✓ Instant feature wall - all year round
- ✓ Suitable for all environments
- ✓ Lightweight system
- ✓ Allows for ambient noise reduction
- ✓ Low maintenance

CRAFTED WITH CARE

ULTRA-REALISTIC LOOK

OVERCOMING COMPLEX DESIGNS

How to create your Green Wall

AS SIMPLE AS 1, 2, 3

1 VISTAFOLIA® PANEL

Each basic pack contains
3 Panels

2 COLOUR & TEXTURE BOXES

Customise the look of your
green wall

3 FIXINGS

Use our fixings for a neat and
reliable installation

VISTAFOLIA® PANELS

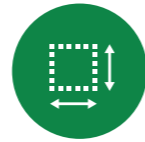

ULTRA-REALISTIC FOLIAGE

The key component of Vistafolia®'s unique artificial wall solution is the Vistafolia® Panel, which is used to create the stunning vertical gardens.

UV-IFR Technology

Each panel measures
80 cm x 80 cm / 31.5" x 31.5"

Tested & Certified

Lightweight system of
7 kg / 15.5 pounds per panel

Quality Standard

Low Maintenance

FULLY UV AND FIRE CERTIFIED

THE MARK OF QUALITY

Every plant is stamped with a VG authenticity mark to help our customers avoid inferior imitations. Quite simply, Vistafolia® are setting the industry standard.

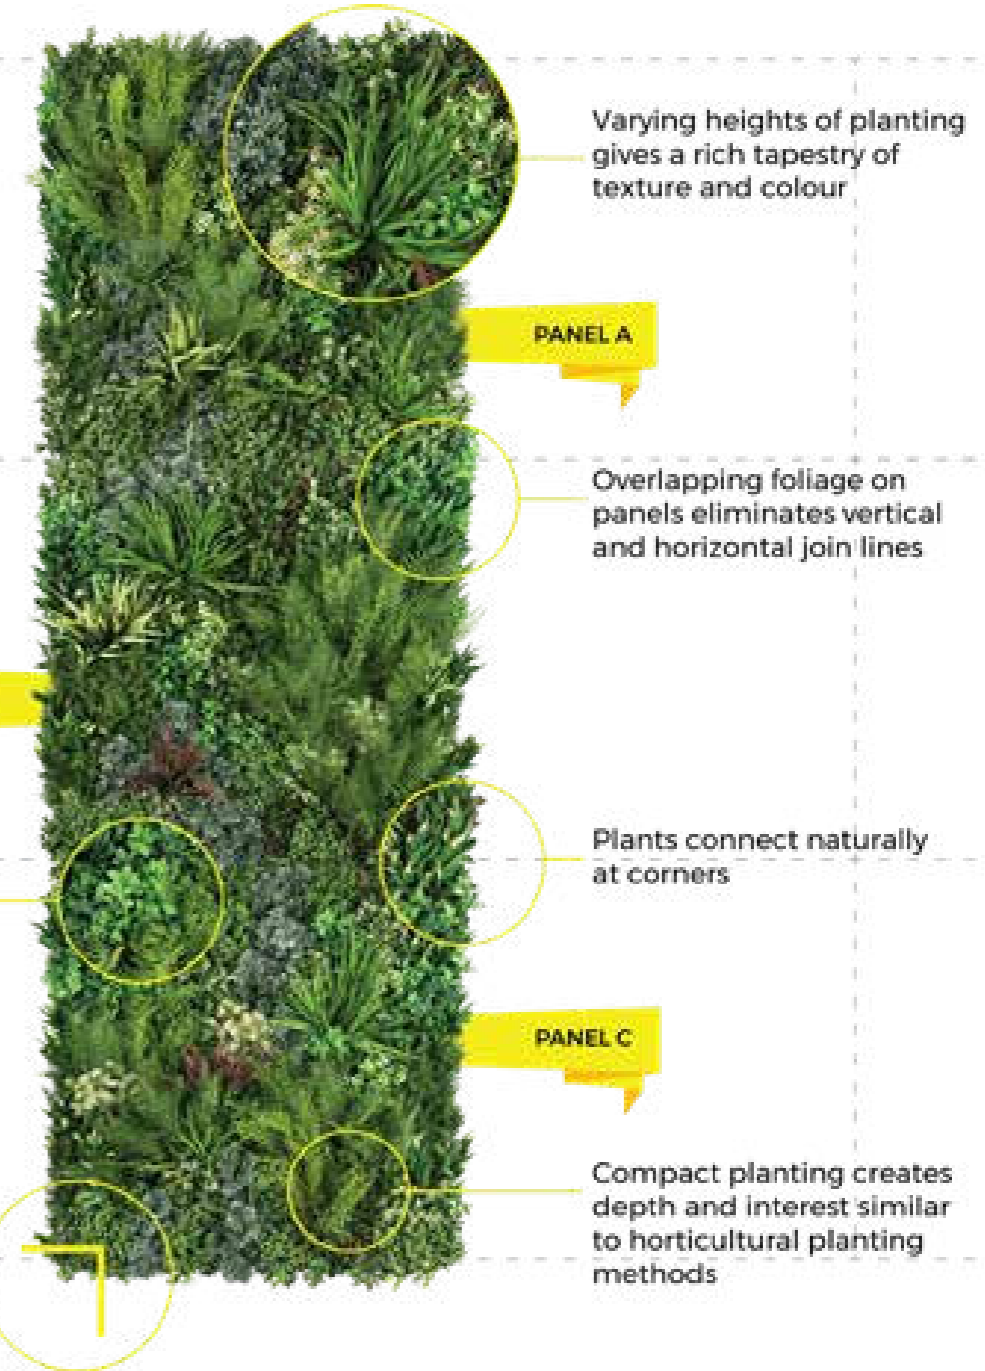

Each basic pack contains 3 Panels

UNIQUE 3-PANEL SOLUTION

The Vistafolia® solution uses a unique three-panel system to create a totally natural look without repetition or visible joins.

- Creates beautiful seamless coverage however the panels are arranged
- The thinking process is all taken care of
- Planting patterns that interconnect naturally
- Easy design templates for users to customise

Varying heights of planting gives a rich tapestry of texture and colour

PANEL A

Overlapping foliage on panels eliminates vertical and horizontal join lines

PANEL B

Different tones of green to look like new growth

Plants connect naturally at corners

PANEL C

50 mm / 2" overhang helps to connect panels

Compact planting creates depth and interest similar to horticultural planting methods

THE FUTURE OF ARTIFICIAL GREEN WALLS IS HERE

Vistafolia®'s lush artificial green wall system panels have been designed to create a beautiful green environment with a realistic effect even in the most inhospitable planting locations.

TRANSFORM YOUR ENVIRONMENT

Whether you are looking to enhance a small corner of your kitchen or working on a large commercial project our design and technical team will be able to assist.

WE TURN YOUR UGLY WALL INTO AN URBAN OASIS

Add Colour and Texture

Change the overall finish of your wall to look the way you want

YOUR WALL YOUR WAY

Simply slot the plants in to add bursts of vibrant colours and extra depth to your Vistafolia® Panels to give you the look and finish that you desire

PREPARE TO BE CREATIVE, OR LET US DO IT FOR YOU

Mix & Match

CREATE SHAPES

Additional plants give the wall a random element that is even more akin to a natural wall that can be used on their own or in a combination

CUSTOMISED WITH COLOUR BOXES

Stunning coloured flowers to draw the eye.

Change the colours from season to season, or simply as your mood suits.

ADD BURSTS OF COLOUR

Each box of additional foliage contains enough plants for around 10 panels

and allows you to create a truly bespoke finish tailored to your own taste.

CUSTOMISED WITH TEXTURE BOXES

Beautifully crafted foliage to add extra depth.

Create really bold textures to make your wall stand out.

ADD BURSTS OF TEXTURE

Each box of additional foliage contains enough plants for around 10 panels

and gives you the tools you need to create a truly bespoke finish.

Vistafolia[®]
at home

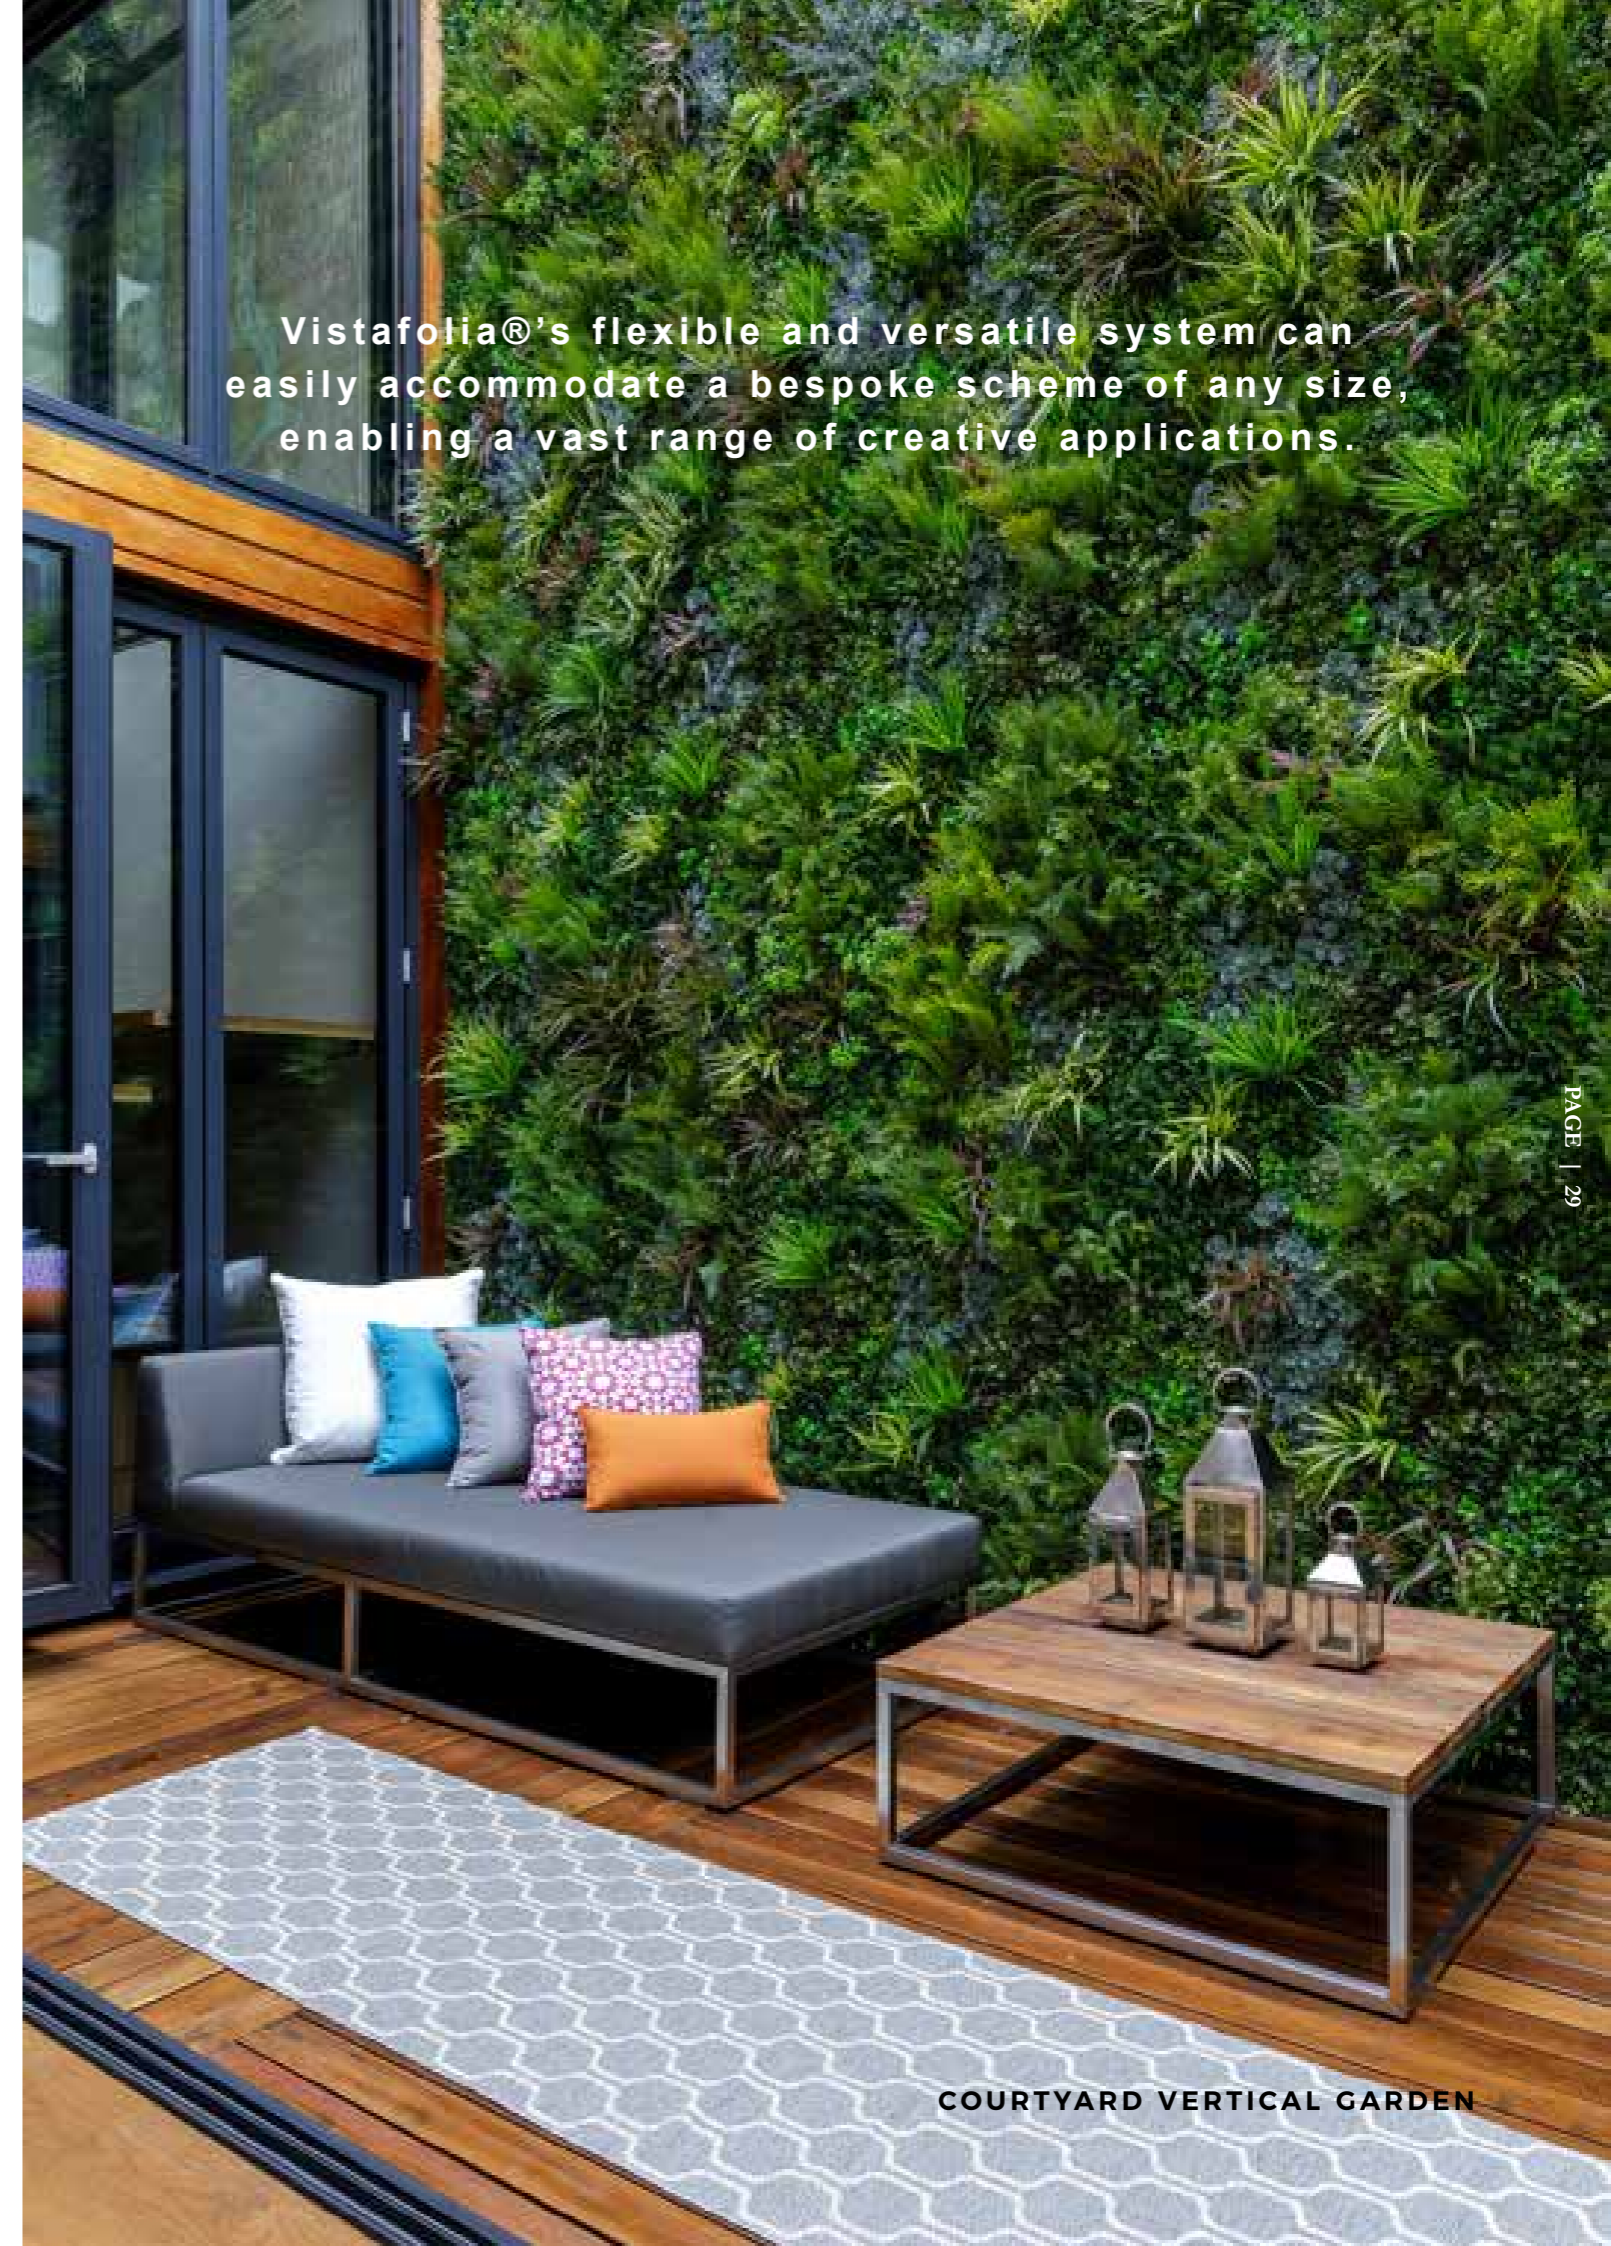

WE GIVE YOU THE POWER TO CREATE

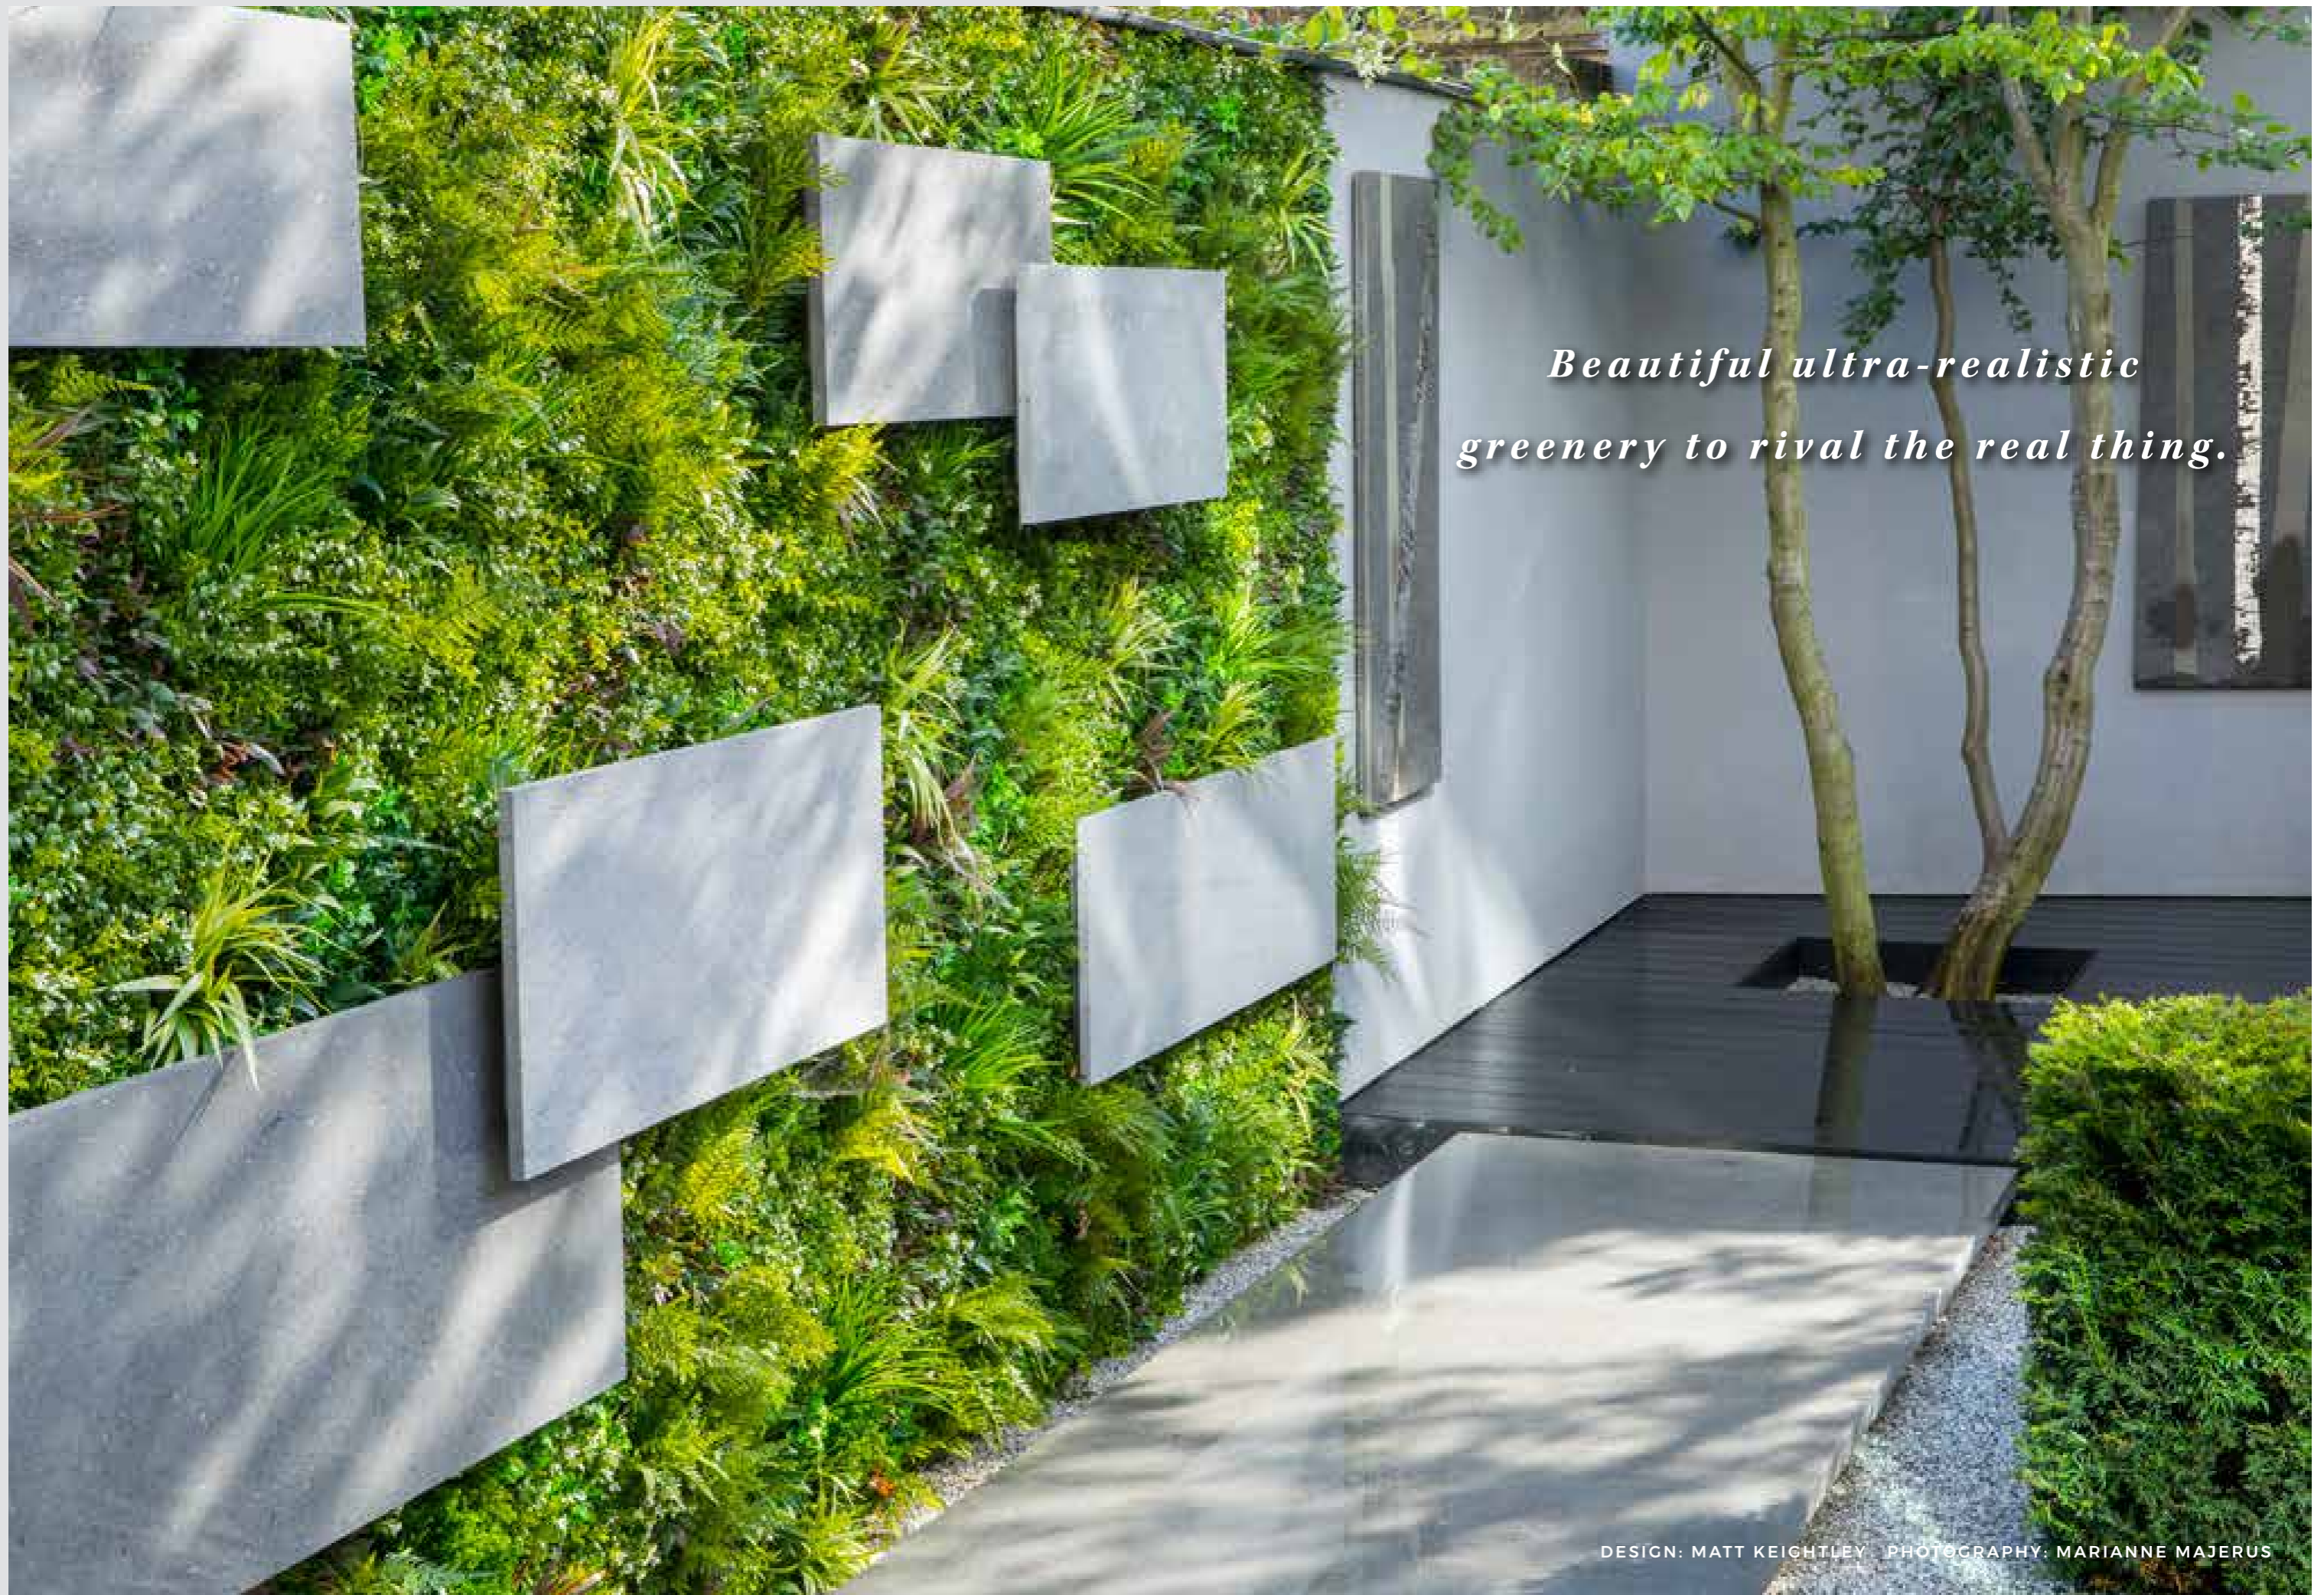

The owner of this house had been waiting for the right solution for this very tight space to come along. Tasked with making it an attractive, functional part of the home, Vistafolia® rose to the challenge, dressing the imposing wall in this tiny courtyard and turning what was a difficult and unloved space into a warm, welcoming nook that is now very much part of the home.

VISTAFOLIA LTD. BRING WALLS TO LIFE

Vistafolia®'s flexible and versatile system can easily accommodate a bespoke scheme of any size, enabling a vast range of creative applications.

COURTYARD VERTICAL GARDEN

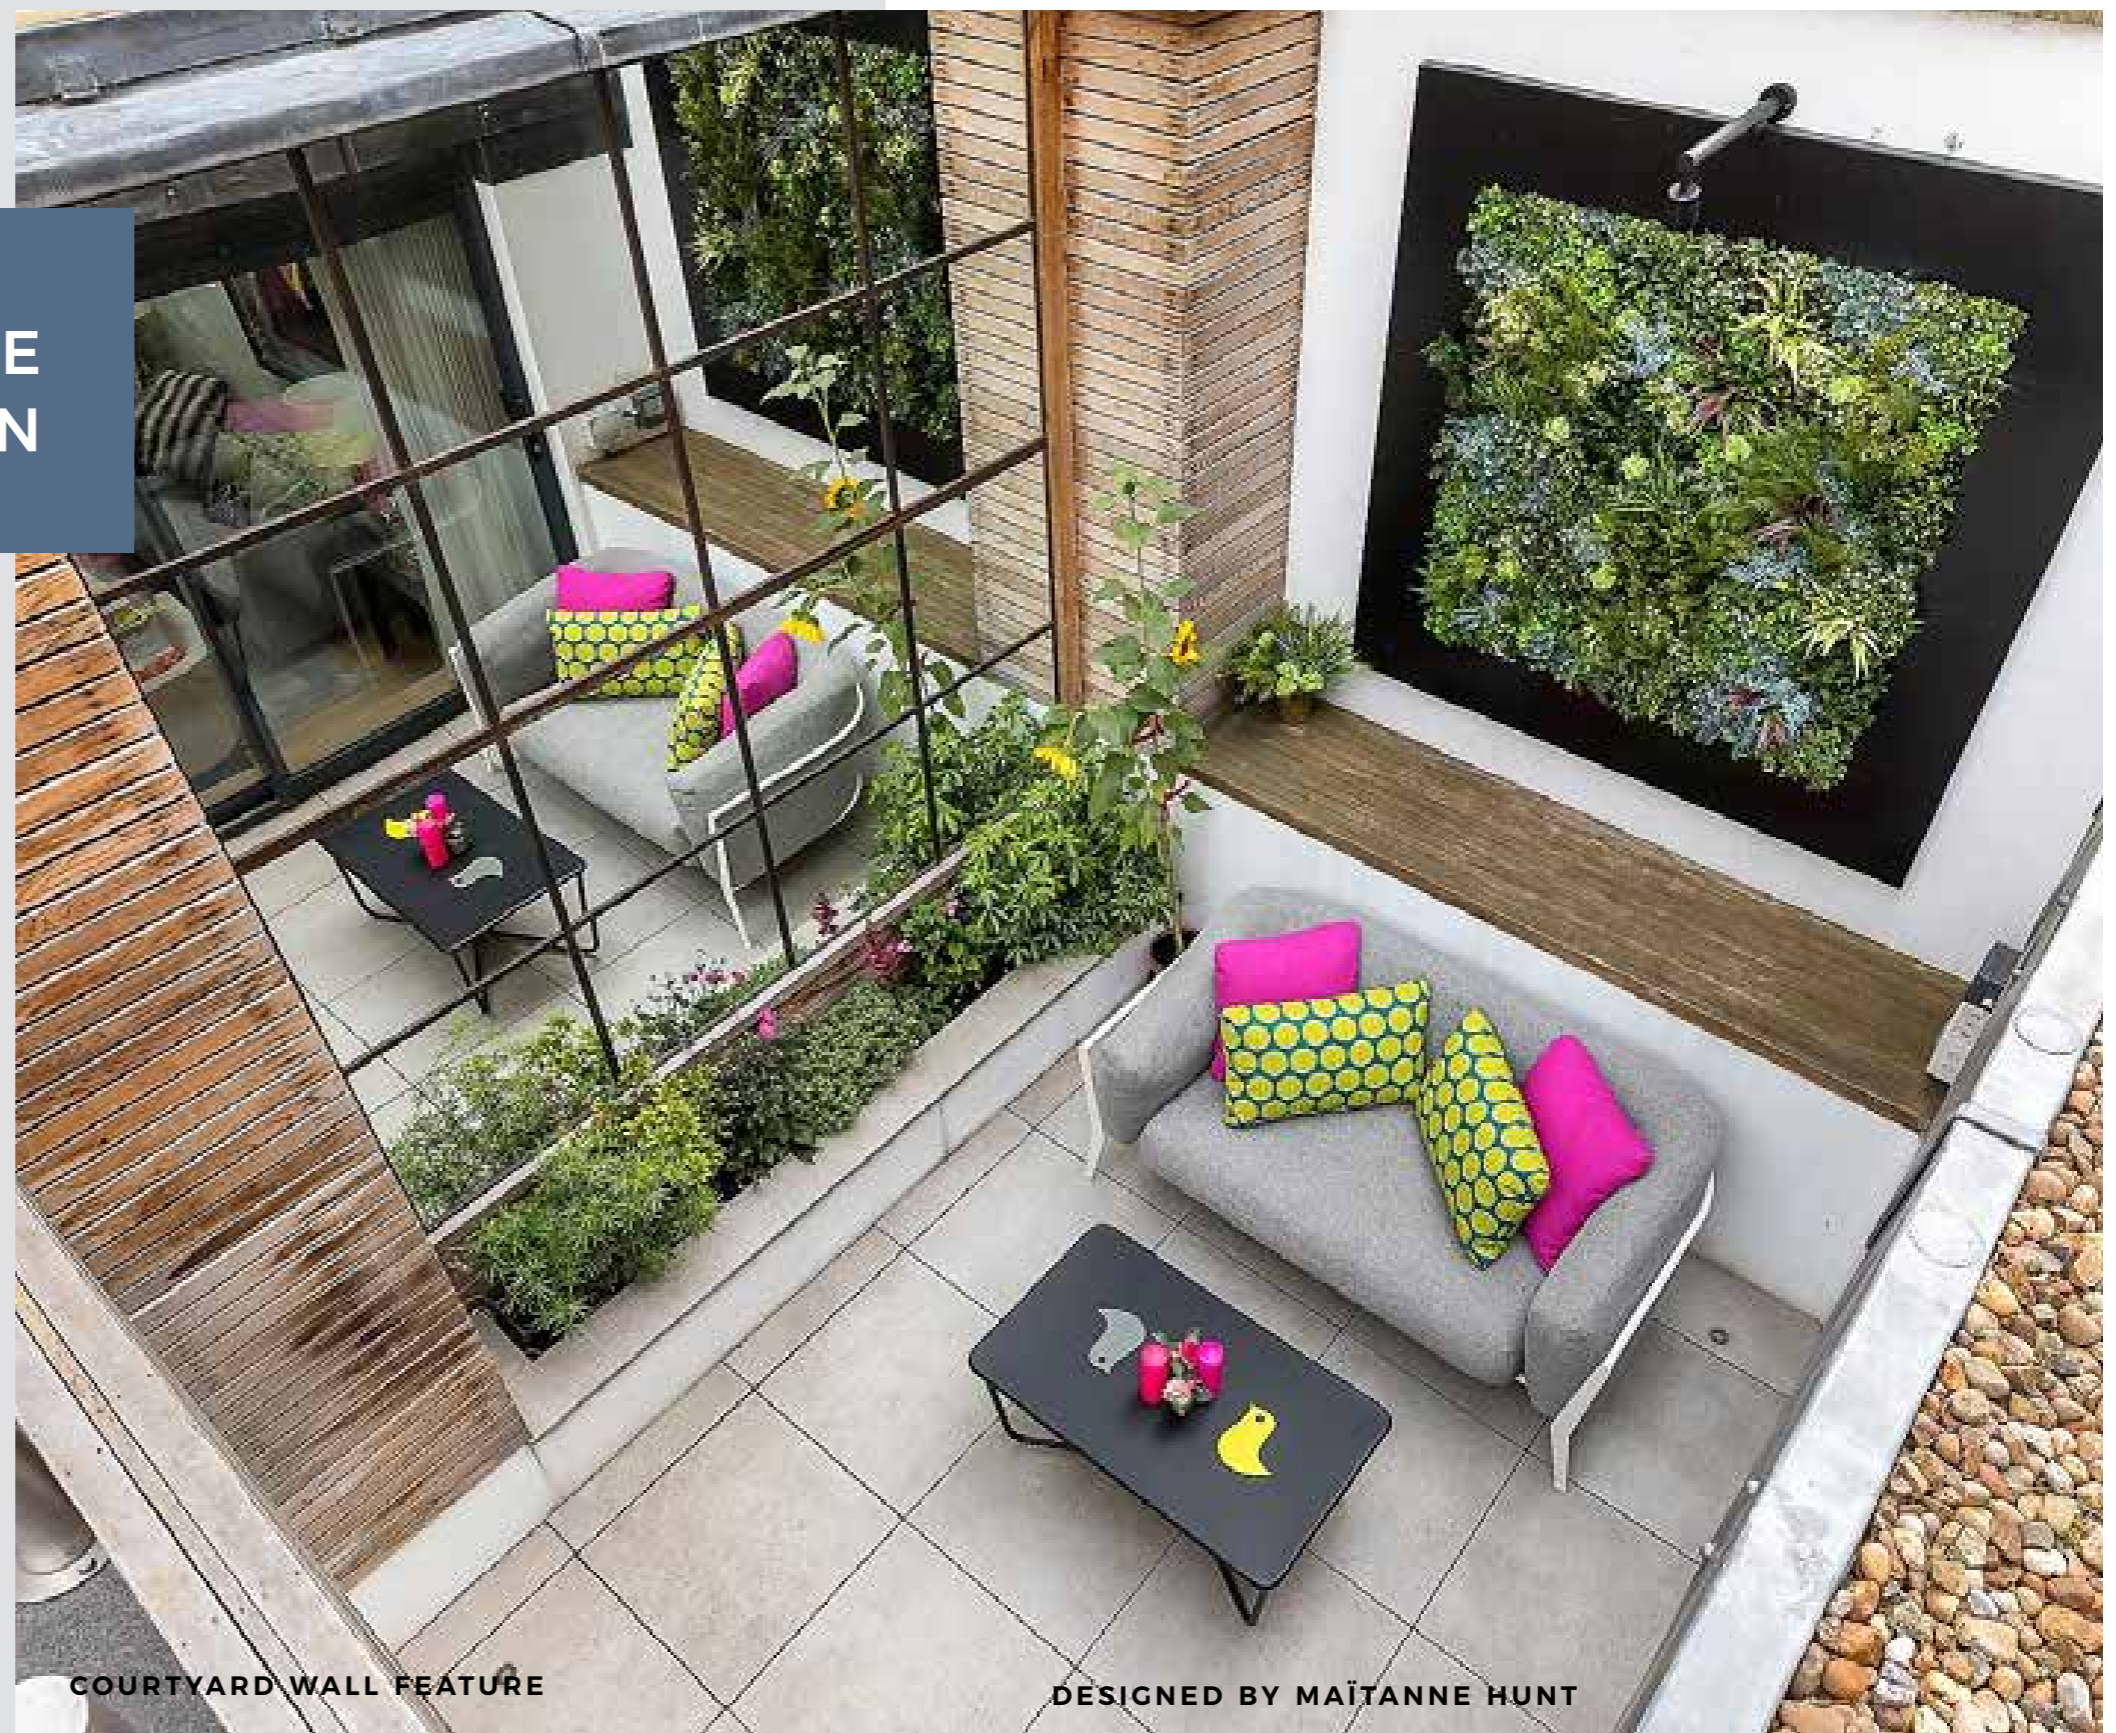

*Beautiful ultra-realistic
greenery to rival the real thing.*

DESIGN: MATT KEIGHTLEY PHOTOGRAPHY: MARIANNE MAJERUS

*Green is second
nature to us*

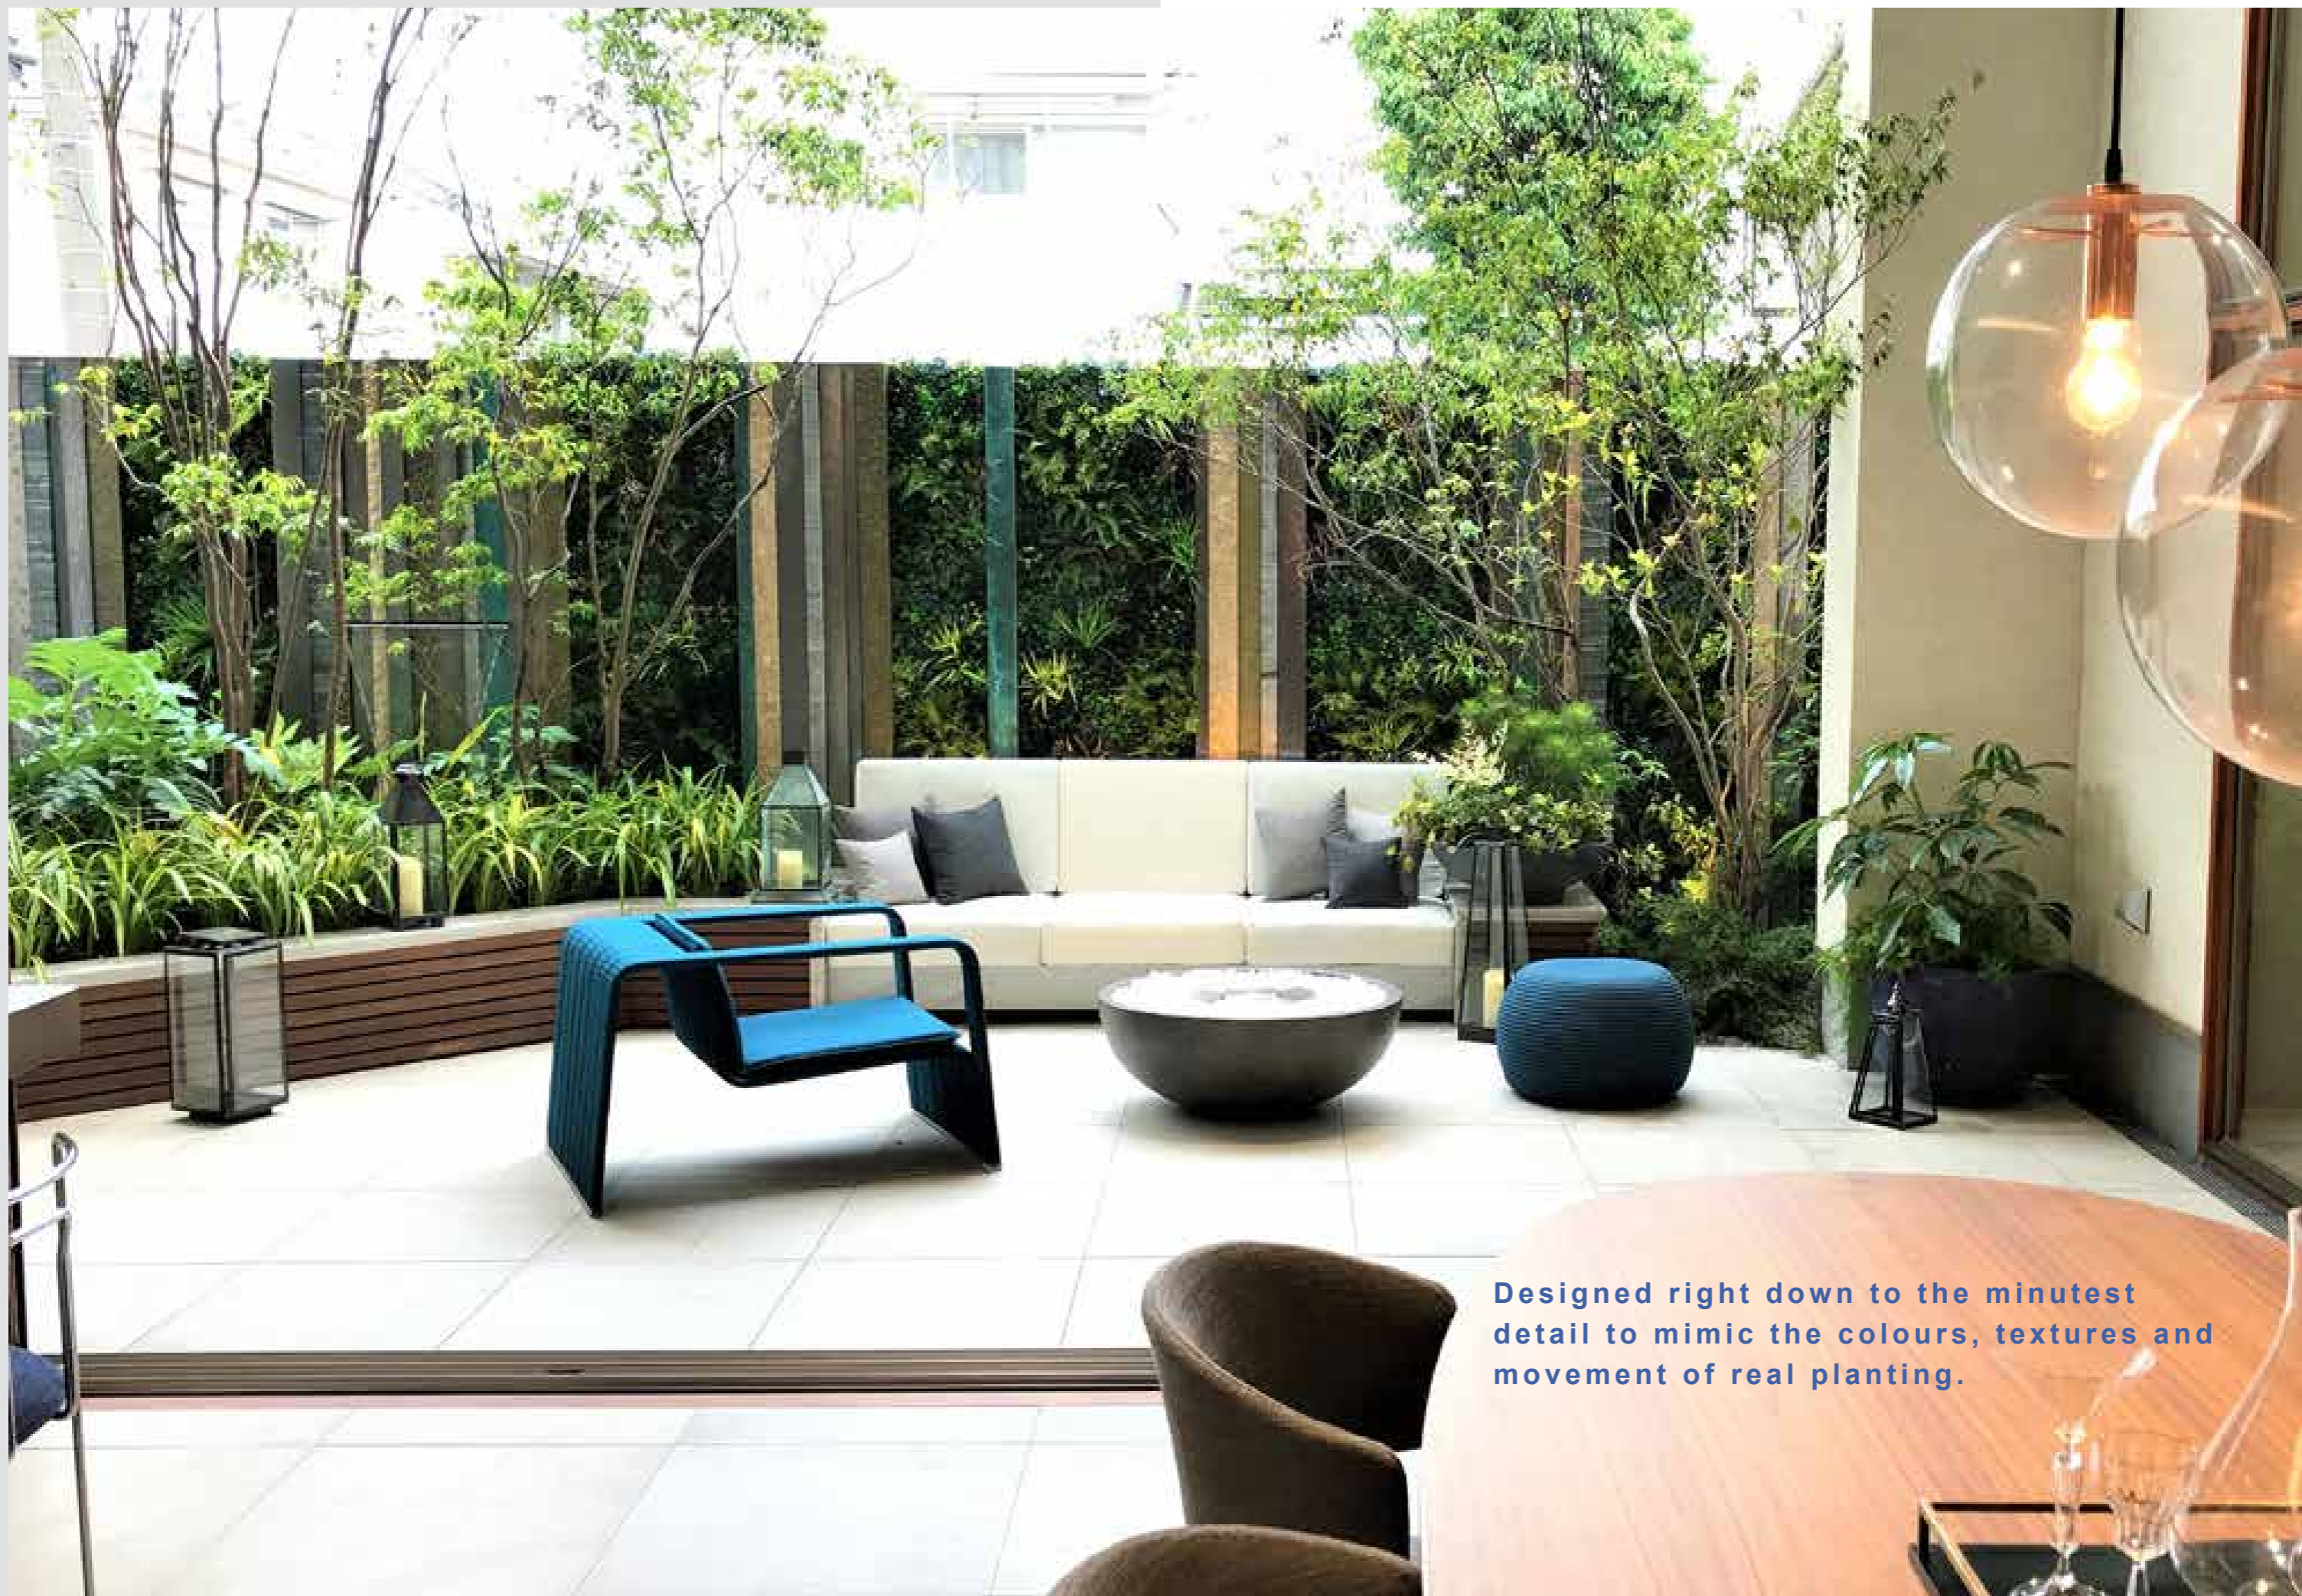

**UNIQUE
DESIGN**

COURTYARD WALL FEATURE

DESIGNED BY MAÏTANNE HUNT

This compact garden by garden designer Maitanne Hunt, with a striking tapestry of artificial greenery, brings nature into the small, open-plan apartment, providing a bright, airy, greenery-accented environment for relaxation while creating the illusion of a bigger space.

Designed right down to the minutest detail to mimic the colours, textures and movement of real planting.

The terrace is the perfect spot to watch Barcelona's beautiful sunsets.

APARTMENT TERRACE - BARCELONA, SPAIN

INSTANT REFRESH

This rooftop terrace overlooking the harbour in Barcelona needed a softening element to balance the opaque glass panels and concrete wall. With Vistafolia®'s textured planting, the rooftop terrace now provides a greener and more natural-feeling sanctuary where the homeowners and their guests can sink into the comfortable sun loungers and enjoy total privacy.

RELIEVE STRESS & CREATE A RELAXING HOME ENVIRONMENT

Create the ideal, low-maintenance outdoor green room with a lush vertical garden and a putting green for the children to play on. Artificial green walls and artificial grass make the perfect partners when transforming an outdoor area into a fun-filled zone that can be used throughout the year.

Swing into action with the ultimate play-zone.

CONTEMPORARY

LIGHTWELL GARDEN

Small corners can also benefit from the potential offered by artificial greenery. The lightwell in this contemporary scheme shows how Vistafolia® can enhance even the smallest space, creating beautiful pockets of no-maintenance, natural-looking planting in challenging conditions where real plants would struggle.

FOCUS ON STYLE

We create feature walls and focal points to complement the interiors of both homes and commercial spaces. Beautiful, lush, life-like greenery creates a refreshing, natural-looking environment and gives interiors an instant lift.

VISTAFOLIA LTD. BRING WALLS TO LIFE

Sophisticated spaces demand stylish solutions. Vistafolia® brings a touch of class to your surroundings.

INDOOR VERTICAL GREEN WALL

VERTICAL GARDEN FACADE

**PRACTICAL
& VERSATILE**

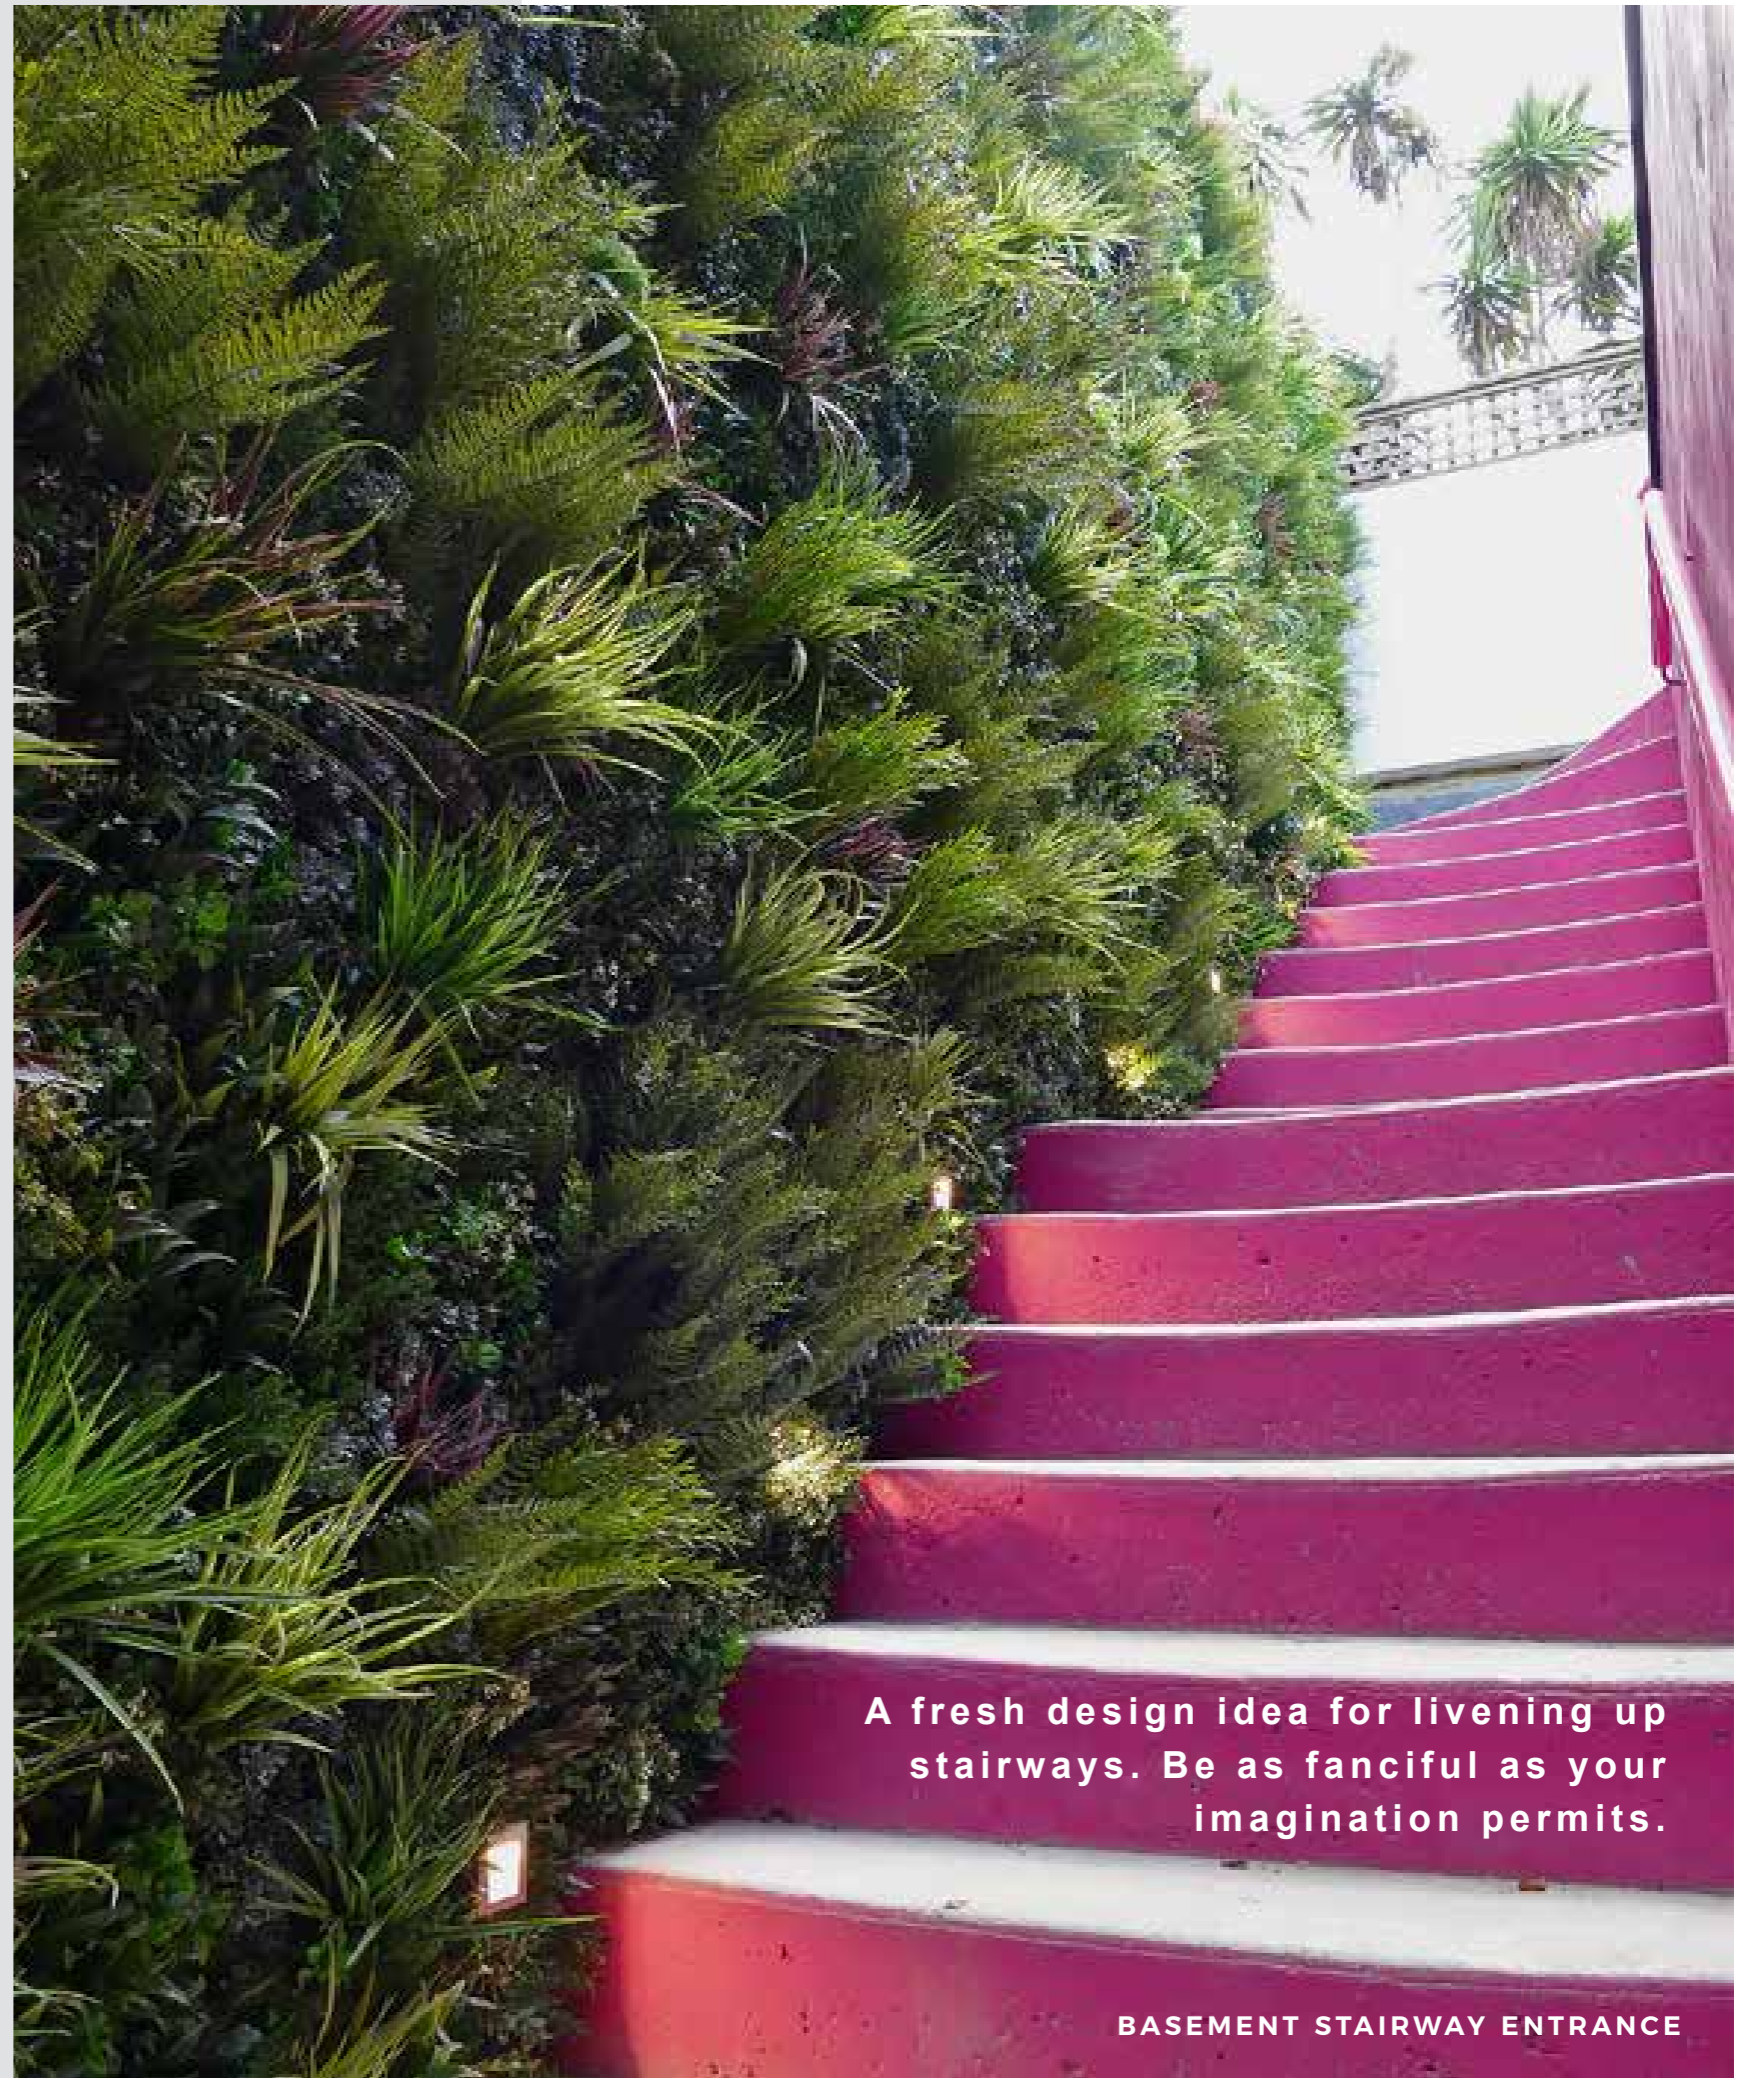

This communal space needed a low-maintenance screening solution. Dressing it up with artificial greenery that looks lush all year round created a beautiful green corridor that requires minimal upkeep.

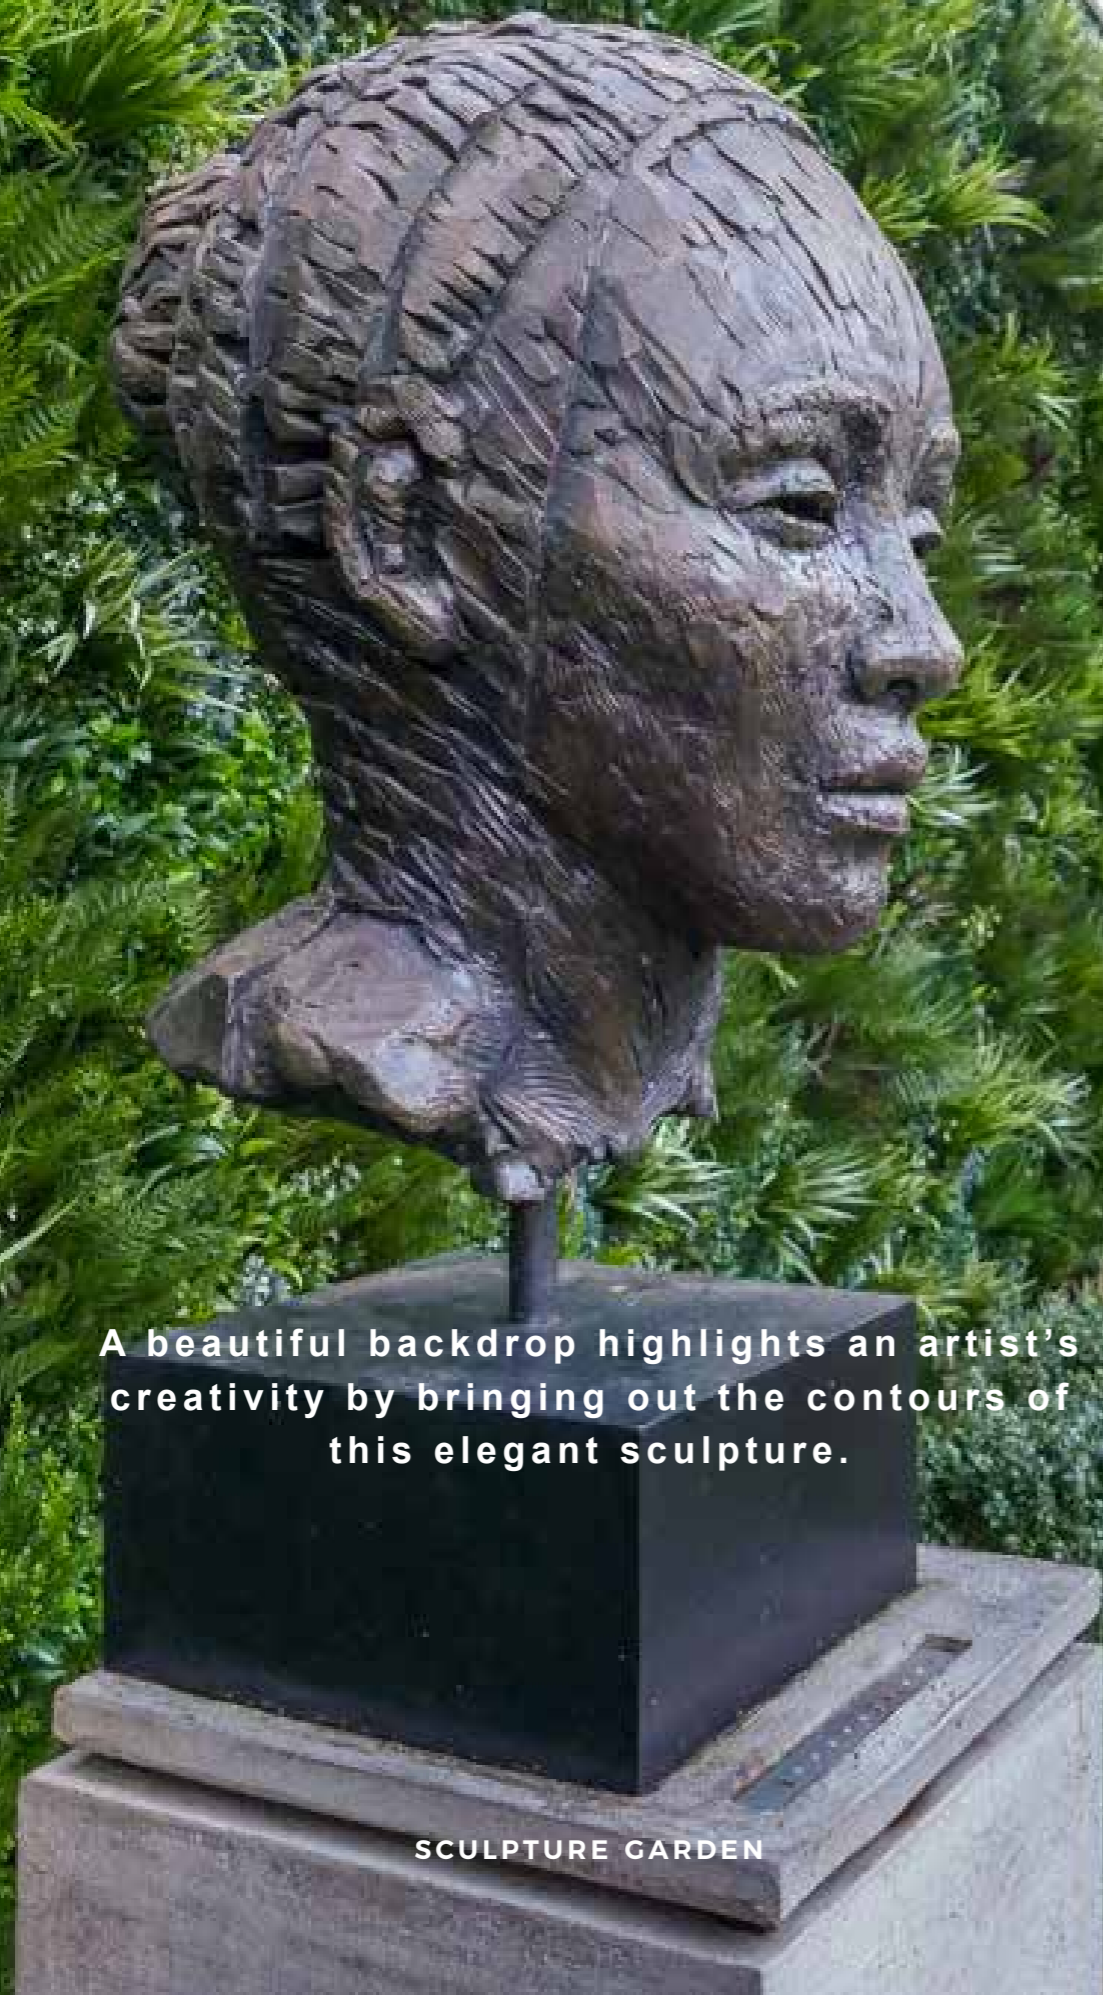

LIFE-LIKE BEAUTY

Give your imagination free rein. This combination of Vistafolia® with bold colour shows how you can use our panels to express your own personality.

A fresh design idea for livening up stairways. Be as fanciful as your imagination permits.

BASEMENT STAIRWAY ENTRANCE

A beautiful backdrop highlights an artist's creativity by bringing out the contours of this elegant sculpture.

SCULPTURE GARDEN

WHERE ART MEETS VISTAFOLIA®

The perimeter of this large, suburban garden is very shady: too inhospitable for real plants. Our artificial green wall is the perfect solution, providing a vibrant background for sculpture while screening the property from its surroundings.

NATURAL LOOK

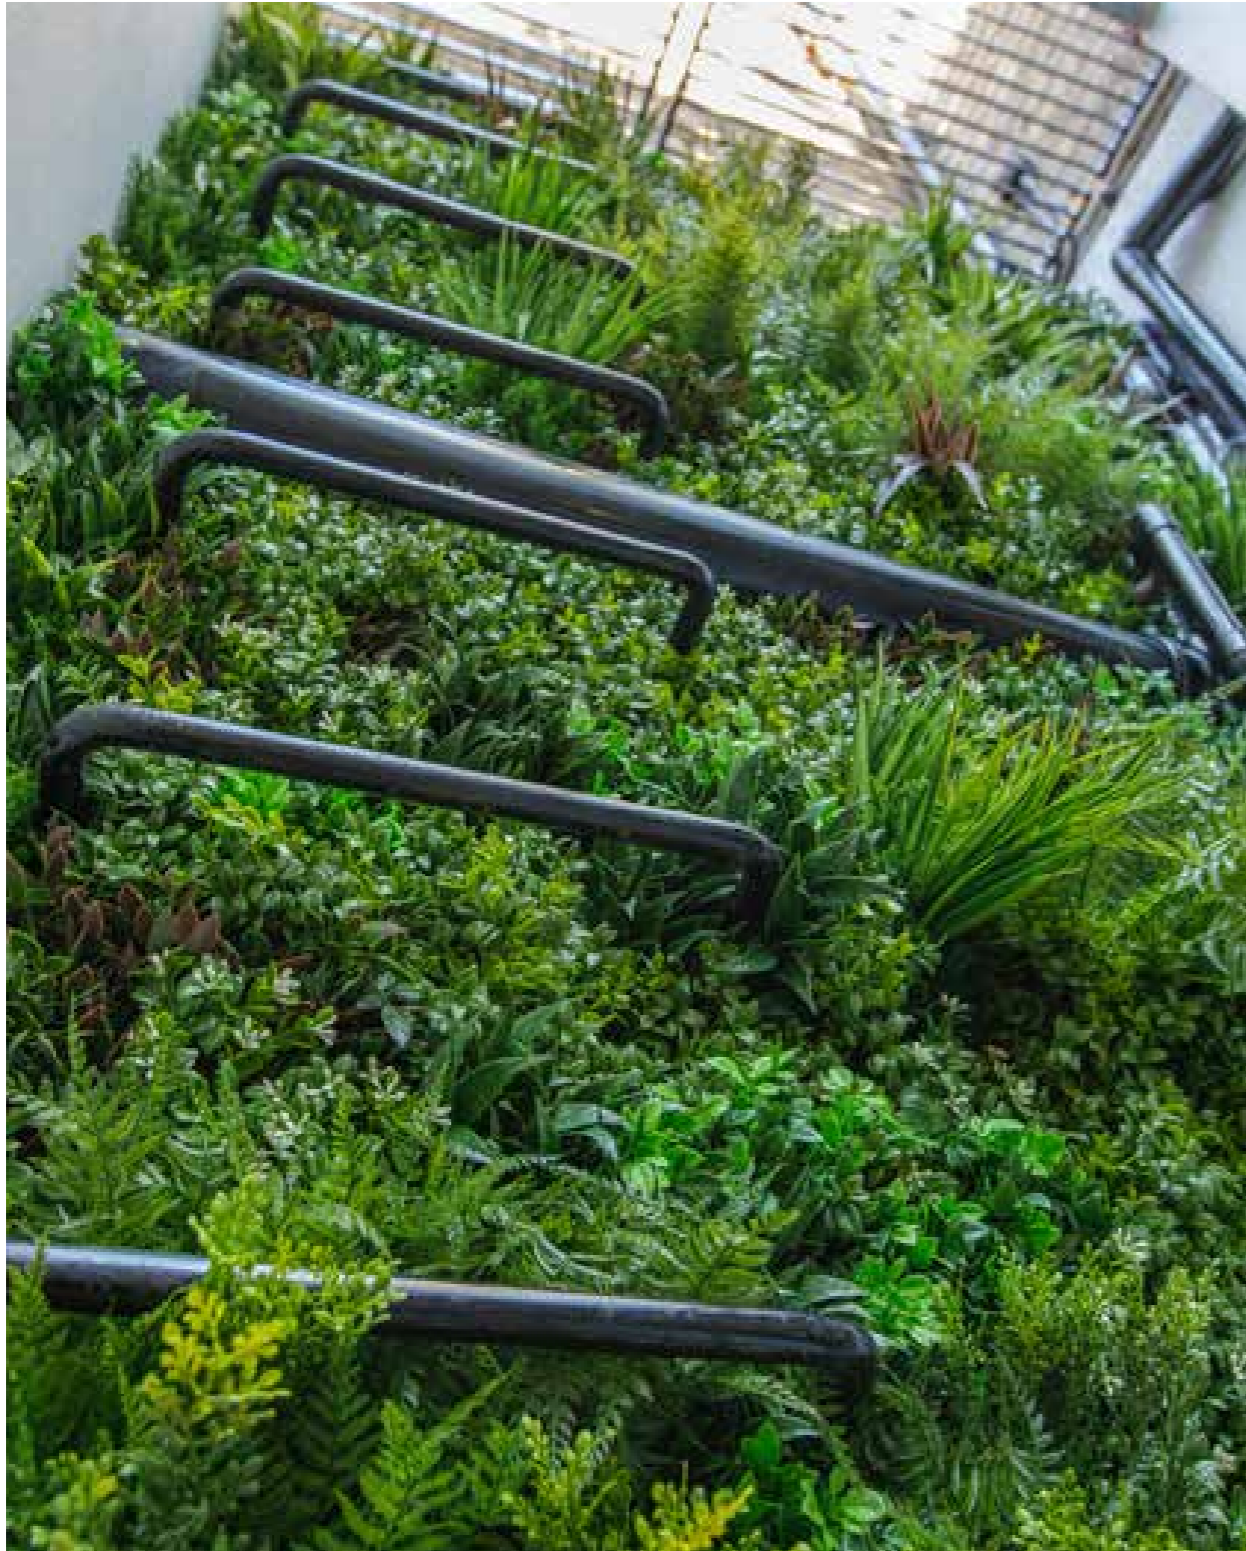

LUXURY ROOF TERRACE

ENGINEERED FOR OPTIMUM PERFORMANCE

Contained within a crisply-edged frame of ceramic tiles, our hyper-realistic and seamless foliage makes a real impact. The greenery was customised on site using our Colour and Texture Boxes, resulting in a bespoke tapestry of Lush Green and clusters of Soft Lavender.

A LUXURY PALETTE OF ARTIFICIAL PLANTS

Here the result of using artificial planting is far better than it would have been using real plants. Looking completely organic, Vistafolia® weaves together around the metal rungs and transforms this functional escape ladder, giving it the air of a modern artwork.

Where nature surrenders, man-made ingenuity takes over. An ideal solution where real walls just cannot flourish due to unforgiving lighting conditions.

DYNAMIC DESIGN

PRIVATE RESIDENCE BASEMENT ENTRANCE

DELIVERING EXCELLENCE

The look of a lush, energising green wall instantly refreshes featureless spaces, such as the staircase of this property. Our seamless foliage panels are a perfect solution for enlivening light-reduced, confined spaces such as corridors and stairways.

A green wall that is ready to please from the get-go is a real prize. We produce instant feature walls that can go up in less than a day, with no need for plants to grow and 'settle'.

YOUR OWN STYLE

We design our panels to allow a high level of personalisation. To add seasonal interest to your green wall, we have created different types of beautiful foliage that you can simply slot into our panels anywhere you like. Change the look of your green wall to suit your taste or mood.

Fresh-looking greenery in a domestic scene adds magic. Green walls are the perfect backdrop for Kitchen 24's cheerful set, evoking a mood of homespun goodness.

TELEVISION SET - KITCHEN 24

YEAR-ROUND GREENING

COURTYARD GREEN WALL DESIGN

ENGINEERED TO LAST

Our artificial solution allows even the most inhospitable locations to benefit from our year-round greening products. Extreme temperatures or lack of sunlight don't affect our products in the same way they would a real wall. This courtyard was cut off from natural light, which is where we come in. Now, the client has their own corner of Eden to enjoy whenever they please.

ENDLESS POSSIBILITIES

Your home is your sanctuary, so why settle for the ordinary? Vistafolia® rises to the challenge of the most imaginative schemes and brings your home alive by making it a true reflection of your personal taste.

Use our vibrant foliage and Vistafolia® Panels to create your own unique design. Add a green twist to a kitchen corner. Make your terrace an urban oasis, or tell the time in high fashion. Surround yourself with refreshing greenery to relieve everyday stresses and put you in the mood for relaxation and fun.

Vistafolia®
for business

Hotels large and small are recognising the aesthetic and functional benefits of artificial green walls that provide stunning designs without the regular maintenance needed for living walls.

Hospitality

THE HARBOUR CONDOS - MIAMI, USA

The Harbour Condo features 330 luxury residences in two 26-storey towers and is considered the ultimate in waterfront living.

THE HARBOUR CONDOS - MIAMI, USA
 INSTALLED BY EASY GRASS MIAMI

Vistafolia® was chosen to dress this luxury condominium, set in five acres of land on Sunny Isles Bay in Miami, with stunning greenery. Comprising hundreds of Vistafolia® Panels, the tapestries of foliage complemented the feature stonework on the facade, softening the sleek lines of the contemporary design. The resulting feature wall, with its imposing breadth, perfectly suits the development's role as an urban oasis.

This instant, low-cost solution transformed the character of the hotel, taking its interiors beyond the ordinary and giving it a modern and sleek finish to entice customers.

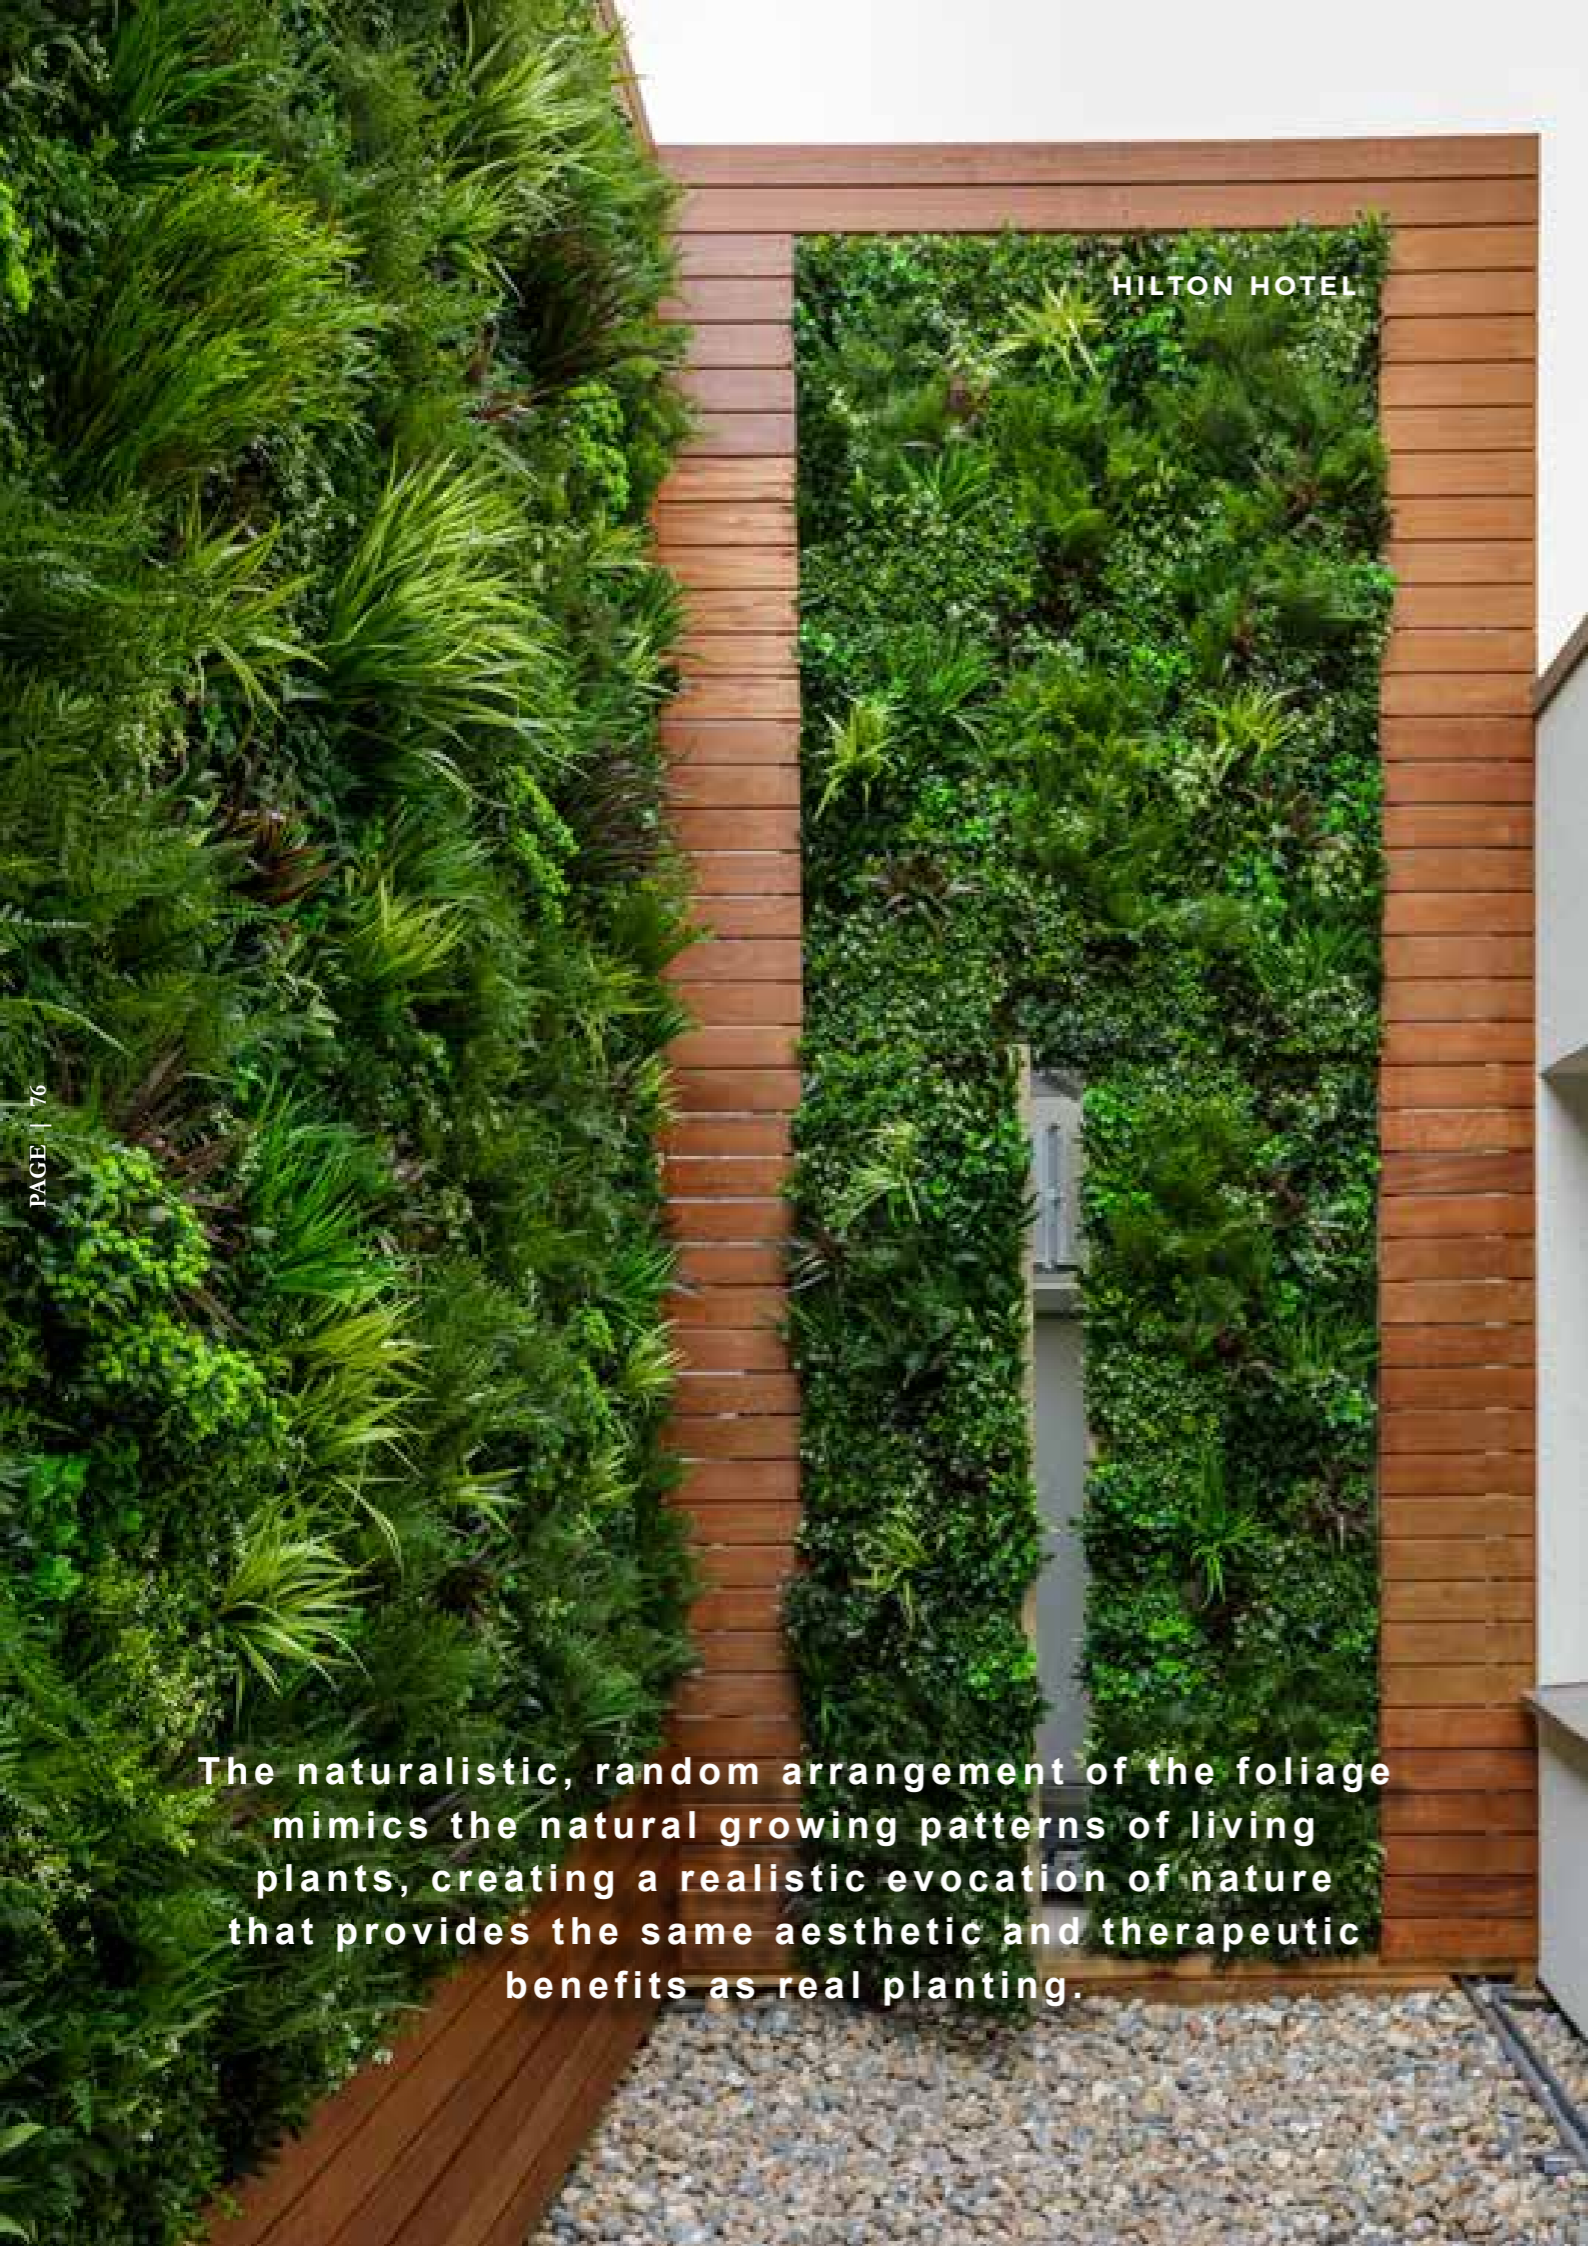

FUSION RESTAURANT, THE LAKE RESORT - ALGARVE, PORTUGAL
 INSTALLED BY WONDERWALL PORTUGAL

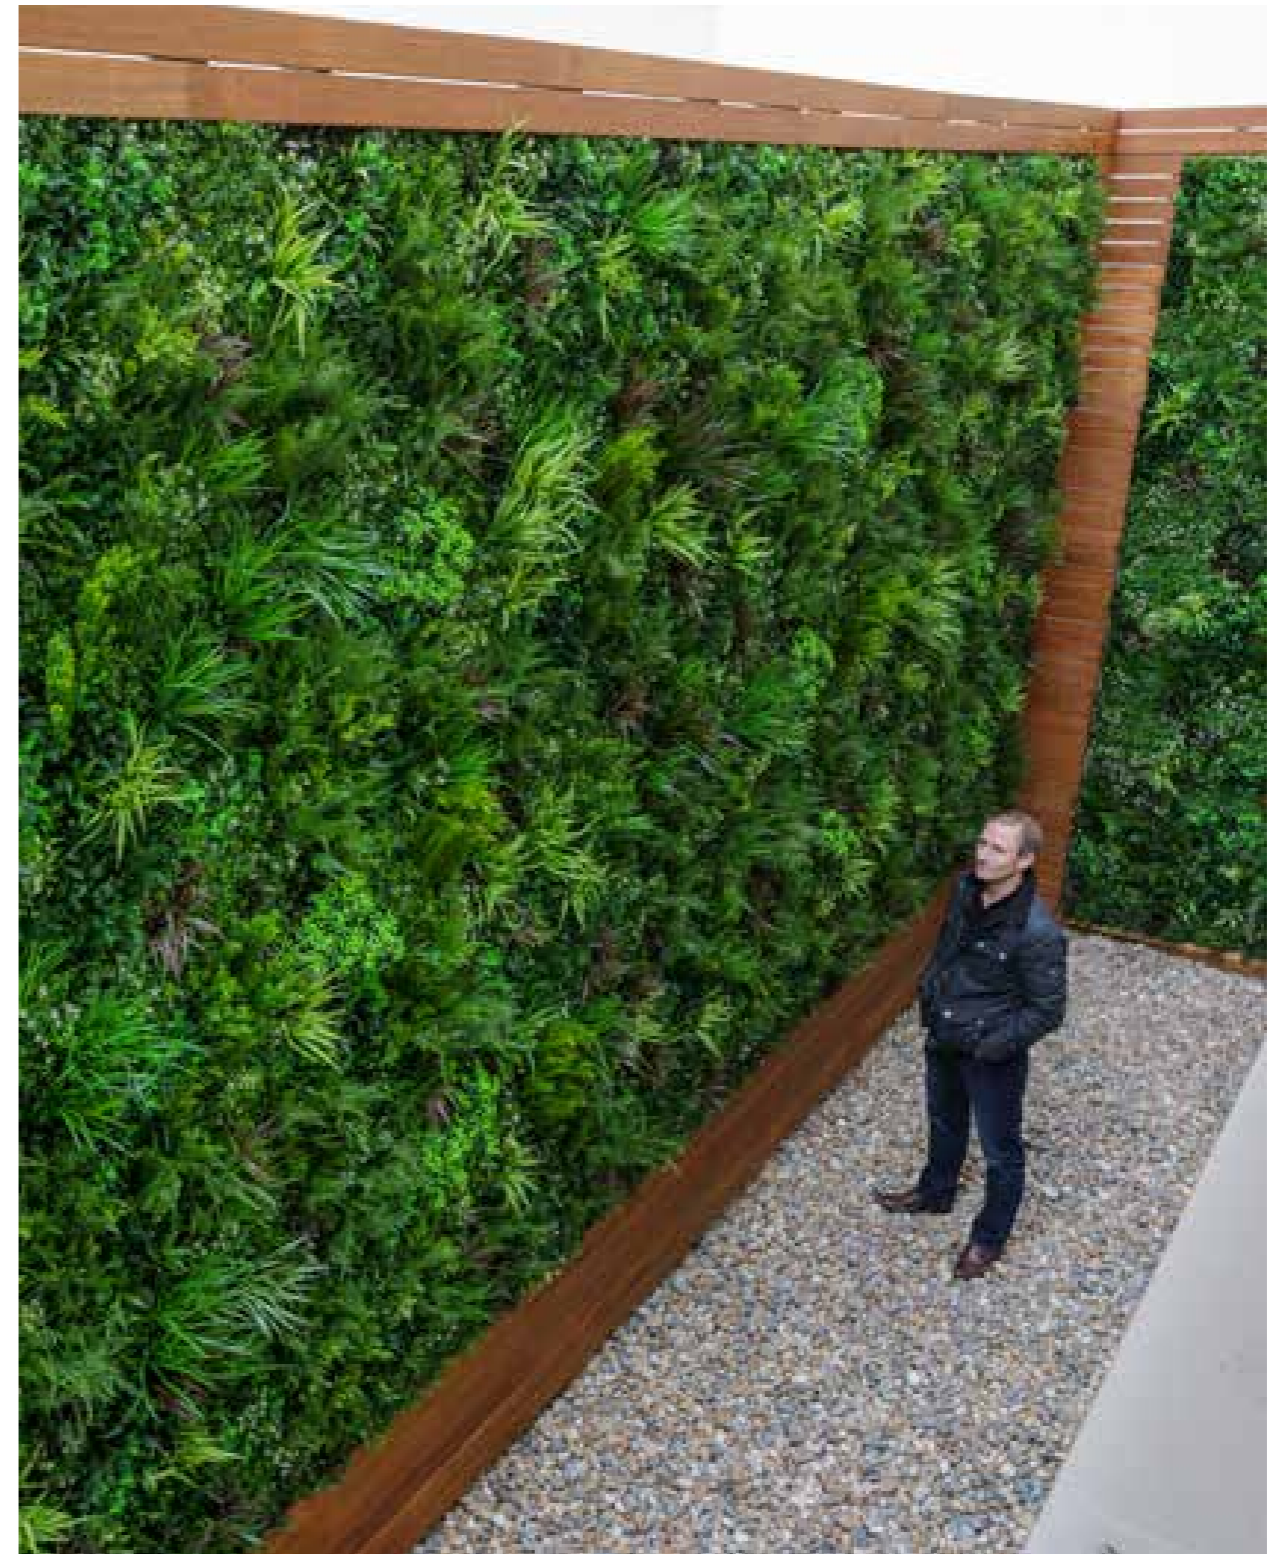

A backdrop of artificial foliage blends happily with any style. Because it gives a proven sense of connecting with nature, it's an increasingly popular addition for businesses who want their customers to feel relaxed and comfortable.

HILTON HOTEL

The naturalistic, random arrangement of the foliage mimics the natural growing patterns of living plants, creating a realistic evocation of nature that provides the same aesthetic and therapeutic benefits as real planting.

QUALITY THAT'S BUILT TO LAST

Industrial air-conditioning units demanded an attractive but practical solution to the ugly view presented to guest bedrooms at the Hilton. Vistafolia® not only installed the Vistafolia® Panels but created the timber frame that defines the space. The result? In place of rooms with an unsightly view, this wall has created premium rooms with a view of beautiful leaf shapes and textures.

VISTAFOLIA LTD. BRING WALLS TO LIFE

A TRUSTED NAME

Vistafolia® offers the perfect solution for breathing life into a space. Whether they be installed as a feature wall, or simply a backdrop to create a point of interest, our walls are certain to get people talking. This restaurant created a soothing ambience for their diners to enjoy, without heaping a whole load of maintenance on themselves.

VISTAFOLIA LTD. BRING WALLS TO LIFE

OOTY RESTAURANT

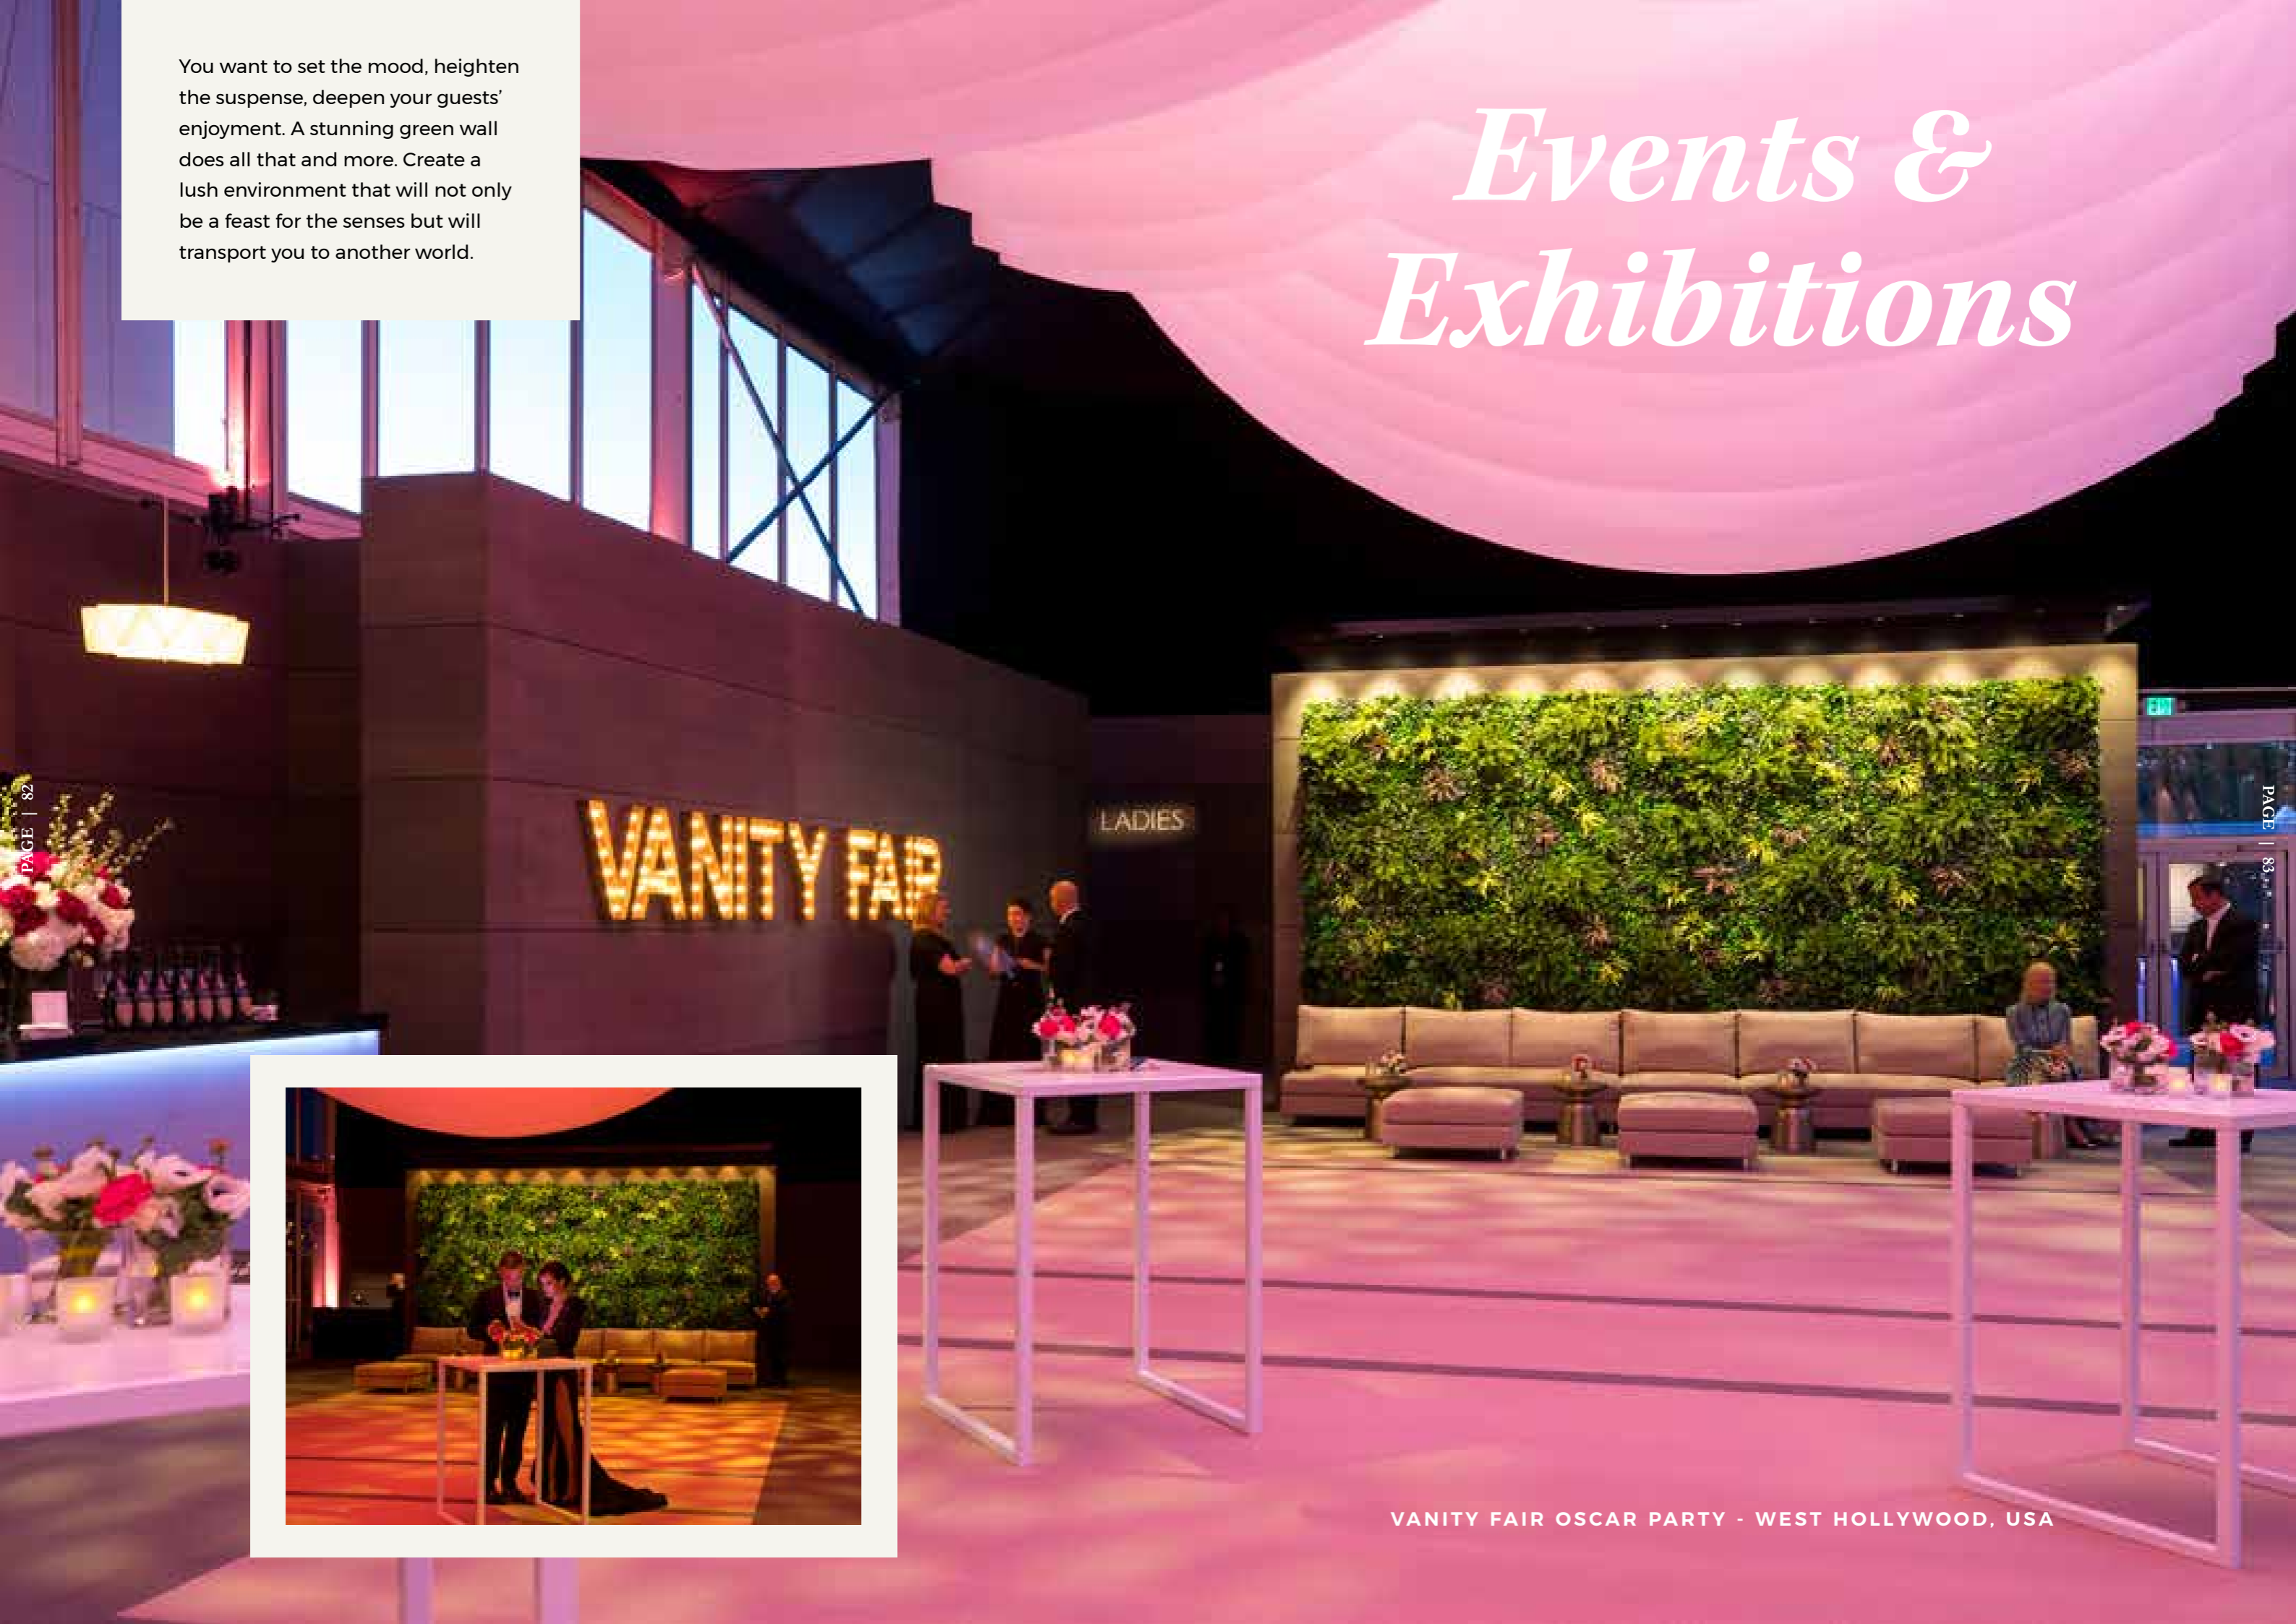

CRUISE SHIP ARTIFICIAL GREEN WALL

Our walls can be found all across the globe, from small private backyards to huge commercial projects. Sometimes the installation is somewhere a little different, such as this installation on a Saga Cruise Ship. Our combination of UV + IFR technology make them perfect for such a job, giving clients complete peace of mind on the safety and longevity of their purchase.

You want to set the mood, heighten the suspense, deepen your guests' enjoyment. A stunning green wall does all that and more. Create a lush environment that will not only be a feast for the senses but will transport you to another world.

Events & Exhibitions

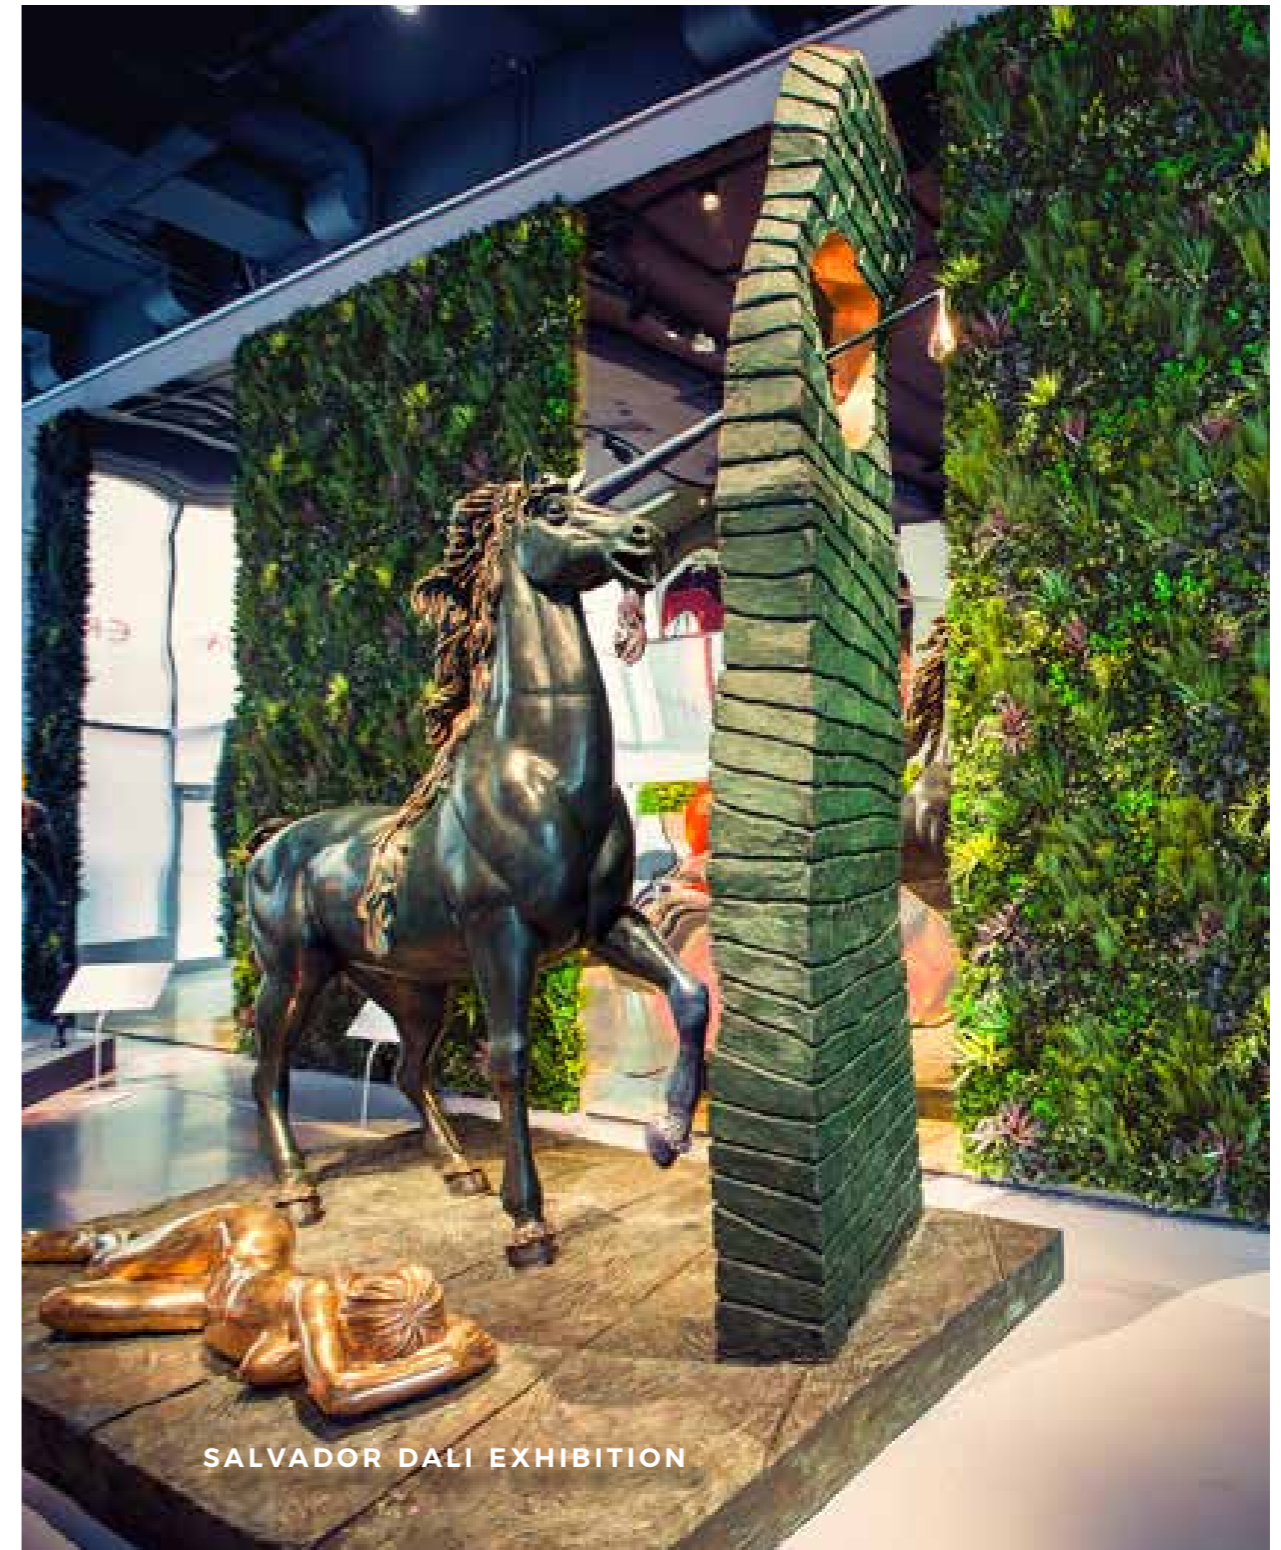

The backdrop of greenery heightens the dramatic effect of Dalí's monumental sculptures, creating a poetic atmosphere for the extravagant bronze sculptures.

ERARTA MUSEUM, ST. PETERSBURG, RUSSIA

GREEN IS SECOND NATURE TO US

SALVADOR DALI EXHIBITION

Erarta, Russian's largest private museum of contemporary art, holds more than forty exhibitions a year. To complement such thought-provoking exhibits as surrealist Salvador Dalí's Space Venus, the museum commissioned Vistafolia® to install floor-to-ceiling green walls. The foliage's variation in colour and texture create an interesting background which nevertheless does not distract from the artwork, making it an excellent choice as a background for sculpture.

VISTAFOLIA LTD. BRING WALLS TO LIFE

Master Chef, the popular and long-running television cooking show, has integrated our green wall into its branding for its Lisbon edition. MasterChef's familiar red logo, the small letter m surrounded by a stove coil, graces a bespoke circular greenery display set against a wood-paneled wall. The logo appears to float against the green wall, which is up-lit for dramatic effect.

Vistafolia®'s vibrant display exudes warmth and energy to evoke the passion of cooking and creation the show stands for.

MasterChef

MASTERCHEF STUDIO - PORTUGAL

The severe environmental conditions at airports – with full sun and strong winds, toxic emissions from planes and high levels of traffic which damage living plants and lead to soil and water acidification – make real planting highly impractical, or restrict it to a very few tough-leaved options.

Artificial greenery gives a much wider array of foliage choice that can be designed to look appropriate all year round and has no requirements for special watering systems or garden maintenance.

Airports

MADE TO LAST

FOUR POINTS BY SHERATON - NAIROBI INTERNATIONAL AIRPORT, KENYA

CHOICE OF INTERNATIONAL BRANDS

Manufactured to last, Vistafolia® is the only artificial green wall system on the market that meets the world's most stringent international import requirements with its ISO 9001 certification and ISO standards of fire and UV testing.

VISTAFOLIA LTD. BRING WALLS TO LIFE

A complex maintenance programme for real plants is undesirable in busy shopping centres as walkways have to be roped off and equipment moved around. Vistafolia® Panels add a natural vitality where artificial lighting, air-conditioning and the number of passers-by make the maintenance of real plants impractical.

Shopping Centres

**FLEXIBLE &
VERSATILE**

GLASGOW FORT SHOPPING CENTRE - GLASGOW, SCOTLAND

NATURAL-LOOKING GROWING PATTERN

The windswept site and strongly curved design of this new modern extension to the Glasgow Fort Shopping Centre presented a huge challenge for landscape architects. Vistafolia® was ideal to create the look they wanted.

Thanks to our choice of leaf shapes and textures, the finished effect looks natural through all seasons in Scotland, yet is also robust and versatile enough to withstand the exposed site and fit the unusual arc of the planting surface.

WARM, WELCOMING SPACE

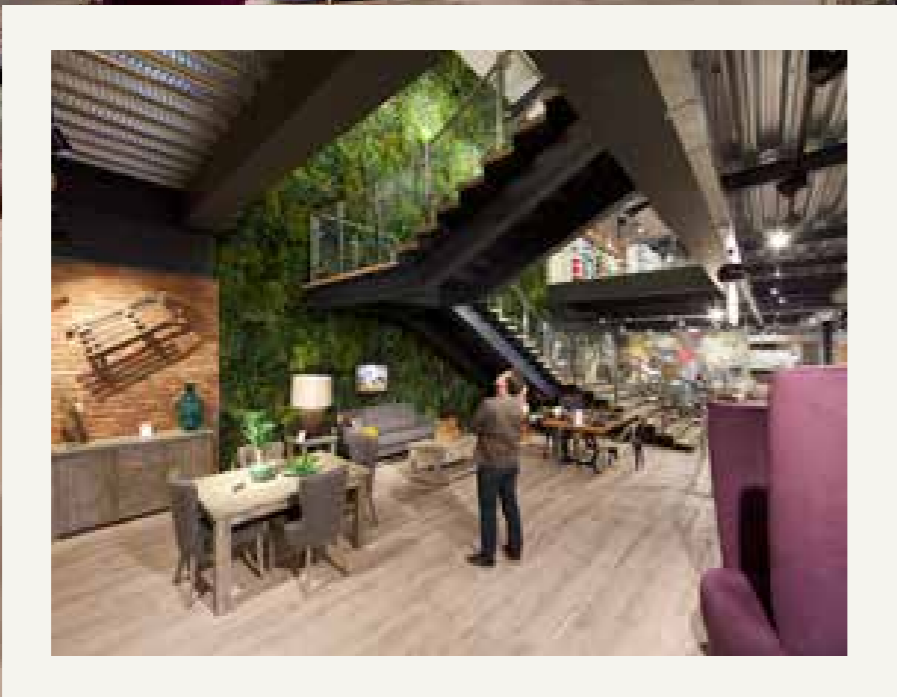

Large shopping centres have very strict rules governing what can and can't be installed for safety reasons. Vistafolia®'s market leading fire classification means that our product satisfies even the most stringent regulations.

SHOPPING CENTRE - BELGIUM

Retail Stores

Top furniture stores realise the benefits of greening their showrooms. Setting out products so that customers can more easily imagine them in their own living rooms is part of the skill of shop design and making a lifestyle statement has so much more impact than a dry display of goods.

Vistafolia®'s artificial green walls make customers want to linger and look, introducing a natural element that makes them feel at home.

TEA SHOP

Vistafolia®'s luxurious green walls have become the artificial solution of choice for some of the world's most recognizable brands. Twinning's Tea, situated in the same London shop since 1706, are one such client. Their wall brings a burst of color to an otherwise dark room, giving their clients the perfect backdrop to take selfies and relax amongst beautiful surroundings.

Vistafolia® has strengthened its relationship with Roche Bobois, with a second commission to create stunning displays of greenery for the French furniture designer's showroom in Scottsdale, Arizona.

ROCHE BOBOIS - SCOTTSDALE, USA

The gold standard in artificial green walls, Vistafolia® is the only brand in its category that can satisfy Roche Bobois' exacting design and technical standards.

VISTAFOLIA LTD. BRING WALLS TO LIFE

Many international design leaders recognise Vistafolia®'s innovativeness and technical excellence, relying on our outstanding quality and product performance to enhance the display of their own products and services.

Here, world-leader Roche Bobois, who work closely with renowned furniture designers and fashion houses, installed our Vistafolia® Panels, with bespoke Colour Box application, in their West Hollywood showroom, in a project that's a perfect example of the natural synergy between Vistafolia® and leading names in design.

VISTAFOLIA LTD. BRING WALLS TO LIFE

French luxury furniture brand Roche Bobois commissioned Vistafolia® to create stunning vertical plant displays in its West Hollywood showroom.

ROCHE BOBOIS - WEST HOLLYWOOD, USA

Workplace wellbeing has become a top priority for today's leading companies. Green environments are known to boost productivity, increase employee engagement and provide the 'biophilic' affiliation with nature that humans crave.

“CHANGING THE
RULES OF THE GAME”
-HELIS

Offices

By Ulrika Rutkauskienė

This dynamic Lithuanian computer software company, specialising in e-sports, needed an interior that reflected their out-of-the-box thinking. To make up for the view out of the window, they chose Vistafolia® to soften the environment and make a welcome addition to the game machines.

Forward-thinking companies dedicated to innovation see the value in incorporating natural forms into their decor.

POS INTERIORS - GUERNSEY, CHANNEL ISLANDS, UK

INSTALLED BY POS INTERIORS

CREATIVE INTERIOR

UPLIFTING ENVIRONMENT

POS Interiors, Guernsey, offer specialist workplace consultancy on how to create an inspiring environment that fosters wellbeing within your workforce and increases productivity.

Our Vistafolia® Panels grace a double-height feature wall, creating a calm counterpoint to the energetic lettering of nearby artwork. The textures and colours of the planting immediately engender a warm, welcoming atmosphere conducive to effective working.

WARM, WELCOMING SPACE

ADD SOFT LAVENDER AND DELICATE WHITE TO GET THIS LOOK

By installing green walls, this co-working space has given workers in the hi-tech companies that use the offices, a bright and pleasant communal area where they can enjoy networking with fellow entrepreneurs over tea or coffee, providing an inspiring ambiance to aid collaboration in this new creative hub.

OFFICE RECEPTION AREA

This impressive free-standing structure, installed in the atrium of this new building, cleverly echoes the trees outside, anchoring it firmly within its surroundings and bringing the outdoors in. As real plants would have proved too expensive and impractical, it was specifically designed for artificial foliage.

VISTAFOLIA LTD. BRING WALLS TO LIFE

STUNNING VERTICAL GARDEN DESIGN

BESPOKE DESIGN

We provide a comprehensive design service, capable of presenting solutions with cost effective, low maintenance features that meet the needs of your project. Our technical team have years of experience behind them and their countless successful installations allow them to transform your environment and create bespoke designs with the minimum of fuss.

Lightweight and designed for maximum flexibility, Vistafolia®'s Panels are excellent for rooftop environments, providing an attractive, practical alternative to real planting.

Technology-orientated offices have been at the forefront of an emerging greening movement in the workplace, a reflection of a larger trend towards eco-buildings.

OFFICE RECEPTION AREA

While meeting the client's requirements for a low-maintenance solution, Vistafolia®'s Vistafolia® Panels heighten the fun, nurture working atmospheres and add a subtle decorative element within a minimalist design.

TRULY UNIQUE

INSPIRED BY NATURE

Vistafolia® contributes strongly to the warm, comfortable feel of the rooftop retreat of this popular casino.

Our artificial living wall provided the perfect solution for filling the terrace with lush green foliage, softening the concrete and steel exterior with vertical planting while leaving plenty of room for seating. The casino now has a green space where guests can relax in the open air.

THE VISTAFOLIA® DIFFERENCE

Vistafolia® designers work hard to capture the exact colours, shadings, dimensions and movements of real plants. Our meticulous workmanship comes from a deep appreciation of nature. The splendour of creation inspires us to bring every leaf on our panels to life, faithfully replicating its vibrant colours, elegant shapes and mesmerising movements.

While our Vistafolia® Panels are engineered with rigorous technical precision, we also see ourselves as artisans who work with our hands to create beautiful and functional decor that pleases the senses.

OUR TEAM

Our highly experienced and dedicated team are committed to making the whole world beautiful, one panel at a time. Their passion, skills and knowledge are central to the success of the company.

Our London-based design team combine over 25 years of design and landscaping practice and a love of horticulture to make Vistafolia® the best artificial greening solution for interior and exterior spaces in the world.

Our production and sales teams are committed to delivering product excellence and quality assurance, while making customer service and satisfaction their top priority.
